

How to change the Language of the GUI in Win10?

1. Start with a click on the Windows button → *Systemsteuerung*

2. After that the Control Panel window should appear. Search for *Zeit, Sprache und Region* and click on *Anzeigesprache ändern*

- Now, in this window, select the Languages field and then select your desired language from the drop-down list. Press the **Übernehmen** button to confirm.

- Now you need to log out of your account and log in again. Only then will the changes take effect

-
