Find out about the admission requirements for the Bachelor’s program in Business Administration at the University of Mannheim (e.g. "Abitur", orientation test, German language skills).

Apply online at www.bewerbung.uni-mannheim.de between May 15 and July 15. Here you will find all information on the documents you have to submit.

At the beginning of August, you will be notified if your application has been successful and, in case that it was, you will receive an admission offer.

If you would like to study Business Administration at the University of Mannheim, just accept the offer and enroll in the University.

Semester starts at the beginning of September. You are now studying in the Schloss! Three exciting years await you. But don’t worry, you will get all the information you need for a successful start in your student life in the welcome week.
START YOUR CAREER IN THE SCHLOSS

The Business Administration program at the University of Mannheim is broadly diversified and provides the ideal basis for your future career.

You will gain a basic understanding of the different fields of business administration and acquire important management skills. Neighboring disciplines such as economics and law also form part of the program. In addition, we want to give you the opportunity to apply your knowledge in practice during your studies: Participating in one of the numerous student initiatives will allow you to use your expertise for social purposes. Furthermore, we maintain an active network of corporate partners in different industries: Interacting with companies at workshops, presentations, and the annual career fair, will give you the opportunity to get in touch with interesting employers on our campus.

PROFIT FROM TOP-LEVEL RESEARCH

Our professors contribute substantially to the latest research developments and share their insights with you.

You will certainly profit from the diversity and timeliness of research findings, which are also reflected in teaching, at one of the largest business schools in Germany. Apart from the classical fields such as finance, taxation, and marketing, current scientific issues in business ethics and business informatics are also part of the program’s curriculum. Active participation in research projects is also possible for students: As a student assistant at one of our Chairs, you will gain valuable insight into Germany’s cutting-edge business research. This often lays the foundation for an academic career. Many (Master’s) graduates choose to pursue a subsequent doctoral degree.

EXPERIENCE INTERNATIONALITY

The semester abroad is an integral part of the Bachelor’s program – but our own campus is also clearly international.

Chinese, English, French, Italian, Japanese, Russian, and Spanish – in your first semester, you will select one of these languages to learn or deepen your skills. The integrated semester abroad is a special international facet of the Bachelor’s program: In their fifth semester, all students of a cohort leave the campus for half a year. Two hundred partner universities worldwide give our students the opportunity to gain intercultural experience and vision. These partnerships are based on the exchange principle and provide internationality for our own campus: every year about 600 students come to Mannheim for their semester abroad. Our international academic calendar and English-taught lectures make this possible without problems.

Lennart Fritzsche
Student in the Bachelor’s program in Business Administration

“The difference in Mannheim is due to the many motivated students, who come together to make a change, are open about political and economic issues, and constantly scrutinize things.”
