

Module Catalog

“Business Administration”

(B.Sc.)

University of Mannheim

(Last update: January 20, 2016)

Structure and Conception of the Program

The bachelor's program "Business Administration" offers a comprehensive economic and business education. With its integrated semester abroad at a foreign partner university, the academic interconnection with neighboring disciplines and two elective courses the program has a unique profile. As an elective, students can choose among numerous courses in the fields of business administration, business law and economics (elective section A). In the section of "Managerial Skills" courses such as project management, change management, leadership, conflict management, teamwork, diversity management, mind mapping or time and self-management can be integrated into the curriculum in order to focus on methodical, social and personality competencies. As the decision makers of tomorrow, students also face topics such as "ethics" and "social responsible management" early in their studies. In accordance with the examination regulations, the program includes the following modules:

- Methodological Basis for Economists (19 ECTS)
- Business Administration (78 ECTS)
- Economics (16 ECTS)
- Civil Law and Business Law (14 ECTS)
- Electives (4 ECTS)
- Ethics and Rhetoric (4 ECTS)
- International Studies (33 ECTS)
- Bachelor's Thesis (12 ECTS)

In the Bachelor's program in Business Administration the following superordinated program-specific learning goals (LG) will be covered:

- Program-Specific Knowledge – Students are able to demonstrate and apply program-specific knowledge to identify and solve problems in the respective academic areas. (LG 1)
- Critical Thinking – Students are able to demonstrate critical thinking skills in business decision making. (LG 2)
- Analysis and Writing – Students are able to analyze business topics effectively and express themselves adequately. (LG 3)
- Analysis and Presentation – Students are able to analyze business topics effectively and to present their findings appropriately using presentation technology. (LG 4)
- Teamwork and Leadership – Students are effective team-players, can lead and communicate within a corporate environment. (LG 5)
- Cross-Cultural and International Competence – Students are knowledgeable about cross-cultural and ethical factors as well as the impact of diversity in an international business environment. (LG 6)

Part 1: Module Overview

Detailed information on the modules can be found in part 2.

1. Methodological Basis for Economists

No. of module	Modules	ECTS
CC 301	Analysis	5
CC 302	Mathematics of Finance	3
CC 303	Quantitative Methods	3
CC 304	Basics of Statistics	8

2. Business Administration

2.1 Accounting & Taxation

No. of module	Modules	ECTS
ACC 300	Introduction to Financial Accounting	6
ACC 301	Management Accounting	6
ACC 302	Financial Accounting & Business Taxation	6
ACC 402	International Financial Accounting & Business Taxation	6

2.2 Finance

No. of module	Modules	ECTS
FIN 301	Investments and Asset Pricing	6
FIN 401	Corporate Finance and Risk Management	6

2.3 Information Systems

No. of module	Modules	ECTS
IS 301	Foundations of Information Systems	6
IS 401	Integrated Information Systems	6

2.4 Management

No. of module	Modules	ECTS
MAN 301	Strategic and International Management	6
MAN 401	Organization and Human Resource Management	6

2.5 Marketing

No. of module	Modules	ECTS
MKT 301	Designing the Marketing Mix	6
MKT 401	Strategic Marketing and Marketing in Specific Industry Contexts	6

2.6 Operations

No. of module	Modules	ECTS
OPM 301	Operations Management	6

3. Economics

No. of module	Modules	ECTS
ECO 301	Basics of Economics	8
ECO 302	Microeconomics A	8

4. Civil and Business Law

No. of module	Modules	ECTS
LAW 301	Civil Law	6
LAW 302	Commercial and Corporate Law	8

5. Electives

5.1 Elective A

5.1.1 Business Administration

No. of module	Modules	ECTS
ACC 450	Principles of Group Accounting	3
TAX 450	Taxation of Multinational Firms	3
FIN 450	Consumer Finance	3
FIN 452	Corporate Governance	3
IS 450	Fundamentals of E-Business	3
IS 451	Technical Fundamentals of Information Systems	3
MAN 450	Entrepreneurship, Innovation and Business Model Design	3
MAN 451	Introduction to Nonprofit Management	3
MAN 452	Introduction to Public Management	3
MKT 450	Marketing Communications	3
OPM 450	Fundamentals in Service Operations Management	3

5.1.2 Law

No. of module	Modules	ECTS
LAW 450	Property and Collateral Security Law	3
LAW 451	Consolidation in Partnership Law	3

5.1.3 Economics

No. of module	Modules	ECTS
	Macroeconomics A	8

5.2 Elective B

	Modules in	ECTS
--	------------	------

	Managerial Skills	1
--	-------------------	---

6. Ethics and Rhetoric

No. of module	Modules	ECTS
CC 305	Presentation Skills and Rhetoric	1
CC 306	Business Ethics	3

7. International Studies

7.1 International Studies

	Modules in	ECTS
	International Studies (study abroad semester)	29
	Foreign Language Skills I	2
	Foreign Language Skills II	2

7.2 International Cultural Studies

	Modules in	ECTS
	International Cultural Studies (at Mannheim)	24
	Foreign Language Skills I	2
	Foreign Language Skills II	2
	Foreign Language Skills III	5

8. "Bachelor Thesis"

No. of module		ECTS
BT 450	Bachelor Thesis	12

Part 2: Detailed Information on the Modules

General Information:

- Every module generally extends over one semester.
- Further details for the pass of examinations are settled by the examination regulations.

1. Methodological Basis for Economists

Module: CC 301 Analysis			
Contents: Economizing mainly means optimization under constraints. The course "Analysis" provides the essential basic methods to mathematically solve optimization problems. The second key subject is Linear Approximation.			
Course content:			
<ol style="list-style-type: none"> 1. Functions with multiple variables 2. Partial Derivatives with multiple variables 3. Chain Rule 4. Linear Approximations 5. Differentials 6. Implicit Functions Theorem 7. Multivariate Optimization 8. Optimization under side conditions 9. The Extreme Value Theorem 10. The Envelope Theorem 11. Comparative Statistics 			
Learning outcomes: Students are able to solve optimization problems with and without side conditions, to linearize functions and systems of equations and to use the tools of comparative statistic. The students will have acquired the skill to analyze optimization problems with constraints graphically. The students are able to understand and explain for what the methods learned - Lagrangemethod, Approximation by differentials, etc. - are needed and how they function.			
Prerequisites:			
Required: -			
Recommended: -			
Obligatory registration: no		Further information on registration:	
Courses	Hours per week	Self-study	ECTS
Lecture	2	6	5
Exercise class	2	3	
ECTS in total			5
Form of assessment	Written exam (90 min.)		
Lecturer/Person in charge	Dr. Evguenia Winschel		
Duration of module	1 semester		
Offering	Fall Semester		

Language	German
Program-specific educational goals	LG 1
Range of application	B.Sc. Business Administration, Degree programs of other fields

Module: CC 302 Mathematics of Finance**Contents:**

- Presentation of different interest models
- Valuation of financial assets
- Mathematics of bonds and annuities
- Interest rate calculation
- Bond/yield valuation

Learning outcomes:

Students are supposed to learn about and apply the fundamental methods of the mathematics of finance, as well as its application in business administration. The lecture is concerned with two basic problems. On one hand, a payment flow will be valued (interests, dividends, bond investment). For that, specific interest models will be introduced. On the other hand, the interest yield of different investments will be defined. In addition, the mathematics of bonds and annuities will be thoroughly discussed.

Prerequisites:**Required:** -**Recommended:** -**Obligatory registration:** no**Further information on registration:**

Courses	Hours per week	Self-study	ECTS
Lecture	2*	2*	
Exercise class	2*	2*	3
Tutorial	2*	2*	
ECTS in total			3

Form of assessment	Written exam (45 min.)
Lecturer/Person in charge	Prof. Dr. Peter Albrecht
Duration of module	*1/2 semester
Offering	Fall semester (first half)
Language	German
Program-specific educational goals	LG 1, LG 2
Range of application	B.Sc. Business Administration

Module: CC 303 Quantitative Methods**Contents:**

- Basics of linear algebra
- Solvability of linear systems of equations
- Linear optimization
- Simplex algorithm

Learning outcomes:

Students are supposed to learn about the fundamental methods of linear algebra and apply them to typical problems in business administration. In particular, different algorithms for the solution of linear systems of equations will be discussed and the concept of linear optimization will be introduced. The solution of these optimization problems plays an important role.

After this class, students should be able to demonstrate and apply program-specific knowledge to identify and solve problems in the respective academic areas.

Prerequisites:**Required:** -**Recommended:** -**Obligatory registration:** no**Further information on registration:**

Courses	Hours per week	Self-study	ECTS
Lecture	2*	2*	
Exercise class	2*	2*	3
Tutorial	2*	2*	
ECTS in total			3

Form of assessment	Written exam (45 min.)
Lecturer/Person in charge	Prof. Dr. Cornelia Schön
Duration of module	*1/2 semester
Offering	Fall semester (second half)
Language	German
Program-specific educational goals	LG 1
Range of application	B.Sc. Business Administration

Module: CC 304 Basics of Statistics**Contents:**

The lecture presents an introduction to probability calculus and inductive statistics. Fundamental terms and the basics of probability calculus will be treated. This includes the terms probability, conditional probability, independence and the Bayes' theorem. To the central terms of statistical modeling belong random variables and their allocative function, the general description of discrete and continuous allocation as well as the term expectation. The allocation of two-dimensional random vectors will be discussed and important limit statements for large samples presented. In the course of the statistical part of the lecture, it will be introduced into the basic concepts of the theory of estimation and test theory. This includes the conception behind point and interval estimator as well as significance tests and p-values. Important classical parameter testings will be presented: this includes in particular the one- and two-sample location test, Gauß' test, t-test and Binomial test. Theoretic and practical aspects in the simple linear regression model will be discussed.

Learning outcomes:

Students know basic probabilistic and statistical terms, e.g. expectation, coefficient of correlation, confidence interval, significance test and p-value. They can link the terms and know legalities which are important for their application. They are able to calculate probabilities and statistical values of specified allocations, to solve combinatorial problems and to understand simple derivations of general statements of random variables. With a problem, they can detect the relevant statements, select a solution method and apply it. The students are able to interpret and evaluate the results of statistical methods. Within the frame of a simple statistical problem, they are able to select an adequate test and apply it.

Prerequisites:**Required:** -**Recommended:** -**Obligatory registration:** no**Further information on registration:**

Courses	Hours per week	Self-study	ECTS
Lecture	4	8	8
Exercise class	2	2	8
ECTS in total			8

Form of assessment	Written exam (180 min.)
Lecturer/Person in charge	Dr. Ingo Steinke
Duration of module	1 semester
Offering	Spring Semester
Language	German
Program-specific educational goals	LG 1
Range of application	B.Sc. Business Administration, other degree programs

2. Business Administration

2.1 Accounting & Taxation

Module: ACC 300 Introduction to Financial Accounting			
Contents:			
<ul style="list-style-type: none"> • Introduction to accounting <ul style="list-style-type: none"> ○ Inventory and balance sheet ○ Business transactions not affecting and affecting profit and loss • Accounting principles and book-keeping techniques <ul style="list-style-type: none"> ○ Goods traffic ○ Value-added tax ○ Acquisition costs ○ Revenues and payment transactions ○ Personnel expenditure ○ Amortization of fixed and current assets ○ Accruals and deferrals ○ Provisions ○ Production costs and income statement • General ledger 			
Learning outcomes:			
<p>The students acquire well-founded knowledge of accounting and accounting techniques, as well as a fundamental understanding of the principles of orderly book-keeping (<i>GoB</i>).</p> <p>Based on relevant business transactions, the double entry book-keeping system is presented and applied to concrete applications in practice. Students can individually book business transactions as well as apply the necessary techniques to both open and close the respective accounts.</p> <p>Within the exercise class, this knowledge will be applied by students through independent work in groups on specific accounting issues. The results of the group work are presented as part of the exercise class in plenary and therefore require a deeper understanding and a thorough analysis of the present book-keeping issues. The results obtained are presented in a structured and understandable way clearly and persuasively using appropriate communication media. The focus is particularly on the skills of teamwork and leadership.</p>

	Dr. Dirk Simons
Duration of module	1 semester
Offering	Fall semester
Language	German
Program-specific educational goals	LG 1, LG 2, LG 3, LG 4, LG 5
Range of application	B.Sc. Business Administration

Module: ACC 301 Management Accounting**Contents:**

- Basic terms of cost and profit accounting
- Calculation, cost center and cost type accounting
- Cost schedule and cost function
- Profit and loss accounting, Contribution Costing
- Break even analysis
- Cost information for operative decisions and deviation analysis

Learning outcomes:

Students become familiar with the fundamental concepts of Management Accounting. They can retrace the accounting flow and independently solve calculations from the field of cost and profit accounting, as well as correctly interpret the results of the calculations. Furthermore, the students can manage accounting problems from corporate practice.

Prerequisites:**Required:** -**Recommended:** -**Obligatory registration:** no**Further information on registration:**

Module: ACC 302 Financial Accounting and Business Taxation

Contents:

- Introduction to accounting
- Norms of activation and passivation
- Valuation norm
- Basics of taxes on income
- Determination of taxable income
- Corporate taxation and tax planning

Learning outcomes:

Students will acquire specific knowledge in the areas of financial accounting and business taxation. In the exercise sessions and the team competition, this knowledge shall be applied on specific practical situations. In doing so, various aspects and points of view need to be considered and scrutinized. Moreover, students need to assess the effects of different decision alternatives on the various stakeholders of a business (e.g. shareholders, managers, government, etc.) in order to develop appropriate strategies and action plans. The results of these considerations are presented in written as well as in verbal form. Both forms of presentation require a clear understanding and analysis of the respective problem sets. Results need to be reported in a structured and comprehensible manner with the help of appropriate software. Teamwork and leadership are further objectives of the course, as students form groups for the exercises as well as the team competitions. Accordingly, all outcomes (e.g. developed accounting policies or tax strategies) are presented in groups.

Module: ACC 402 International Financial Accounting & Business Taxation

Contents:

The subject International Financial Accounting and Business Taxation covers International Jurisdiction (Part A) and International Taxation (Part B). In part A of the lecture, individual International Financial Reporting Standards (IFRS) will be presented in detail, whereby the focus lies on the approach and valuation of the annual statement. In particular, the lecture goes into detail of IAS 16 (Property, Plant & Equipment), IAS 38 (Intangible Assets), IAS 36 (Impairment of Assets), IAS 17 (Leases), IAS 11 (Construction Contracts), IAS 37 (Provisions, Contingent Liabilities and Contingent Assets) as well as IAS 39 (Financial Instruments). In part B, the fundamental approaches to tax planning will be treated after an overview on the basics of taxation of corporations and partnerships. In the field of European taxation, the consequences of the jurisdiction of the European Court of Justice on business taxation as well as the harmonization efforts of the European commission will be analyzed. Part B closes with an introduction to international tax accounting.

Learning outcomes:

Participants of the course gain an overview of the major concepts and methods in the fields of international financial accounting and business taxation. Students acquire detailed knowledge of accounting according to IFRS as well as of international tax planning and international group taxation. Participants apply this knowledge to subject-specific issues. Based on the acquired knowledge, they are capable to analyze and discuss further issues and to come up with a solution. Group presentations enhance the students' ability to work in teams and to take on responsibility as a group.

Prerequisites:

Required: -

Recommended: -

Obligatory registration: yes, registration for presentation

2.2 Finance

Module: FIN 301 Investments and Asset Pricing			
Contents:			
<ul style="list-style-type: none"> • Investment decisions (cash value, internal interest rate) • Interest yield and risk (portfolio theory) • Capital costs during insecurities (CAPM, APT) • Corporate governance, agency problems and behavioral finance 			
Learning outcomes:			
Participants of this partial module are able to analyze and judge price movements on the financial and other asset markets. They should be able to independently value stocks and bonds under standard prerequisites with the help of widely-used practical models. Furthermore, the participants will learn to correctly apply methods of capital asset pricing to analyze portfolio decisions as the consideration of risks and return assumption and to distinguish between systematic and diversifiable risks.

Module: FIN 401 Corporate Finance and Risk Management

Contents:

- A fundamental introduction to the modern theory of business financing
- An introduction to business valuation and capital costs calculus
- An introduction to the most important derivatives (futures, swaps, options)
- An introduction to corporate risk management

Learning outcomes:

Participants of this partial module learn to assess and analyze the decision making problems of a finance department. They will be able to understand the effects of the fiscal system on financial decisions and to correctly calculate the capital costs for a corporation. Students will be made familiar with the essential instruments and decision-making processes inherent to the financing of listed corporations (stocks, bonds, loans, convertible bonds and other structured products). They also learn to apply and rate complex instruments, such as e.g. unconditional futures and swaps, and options for the change of chance-risk positions

2.3 Information Systems

Module: IS 301 Foundations of Information Systems			
Contents:			
<ul style="list-style-type: none"> • Introduction and basic definitions in the field of information systems as well as design and structure of information systems • Technological Foundations: hardware and software components, basic functionalities of computer systems and networks, basics of database systems • Development of information systems: project management and development processes, selected methods for analysis and design • Management of information systems: IT Management Framework, Business/IT Alignment, IT Organization, IS Investment, IS Adoption 			
Learning outcomes:			
<p>Students are able to explain the interplay of information technologies, human beings and organizations. They comprehend how information systems are structured and are able to explain the basic functionalities of computer and database systems. Students know the different approaches for the development of information systems and know the basic techniques for the analysis of demands and the design of information systems. They understand the operative and strategic processes for the management of information systems. (LG 1)</p> <p>They are aware of the factors influencing the development and management of information systems, the perspectives of different stakeholders, and can evaluate related decisions. (LG 2)</p> <p>Students are able to analyze requests expressed in natural language and translate them into structured database queries (LG 3). They can analyze requirements for an information system and can present them in a structured format, especially using behavior and structure diagrams (LG 4).</p>

Module: IS 401 Integrated Information Systems

Contents:

This course first outlines the basics of data and business process modelling based on wide-spread approaches such as entity relationship diagrams, event-driven process chains (EPC), and business process model and notation (BPMN). The remainder of the course then focuses on the use and purpose of integrated information systems across different functional areas in industrial companies. Finally, basics of management support systems such as business intelligence systems are addressed.

Outline:

- Business Process Modelling
- Application Systems in
 - Research and Development
 - Marketing and Sales
 - Procurement and Warehousing
 - Production
 - Shipping and Customer Service
 - Finance, Accounting, HR
- Planning and Control Systems

Literature:

- Mertens et al.: Grundzüge der Wirtschaftsinformatik, 7. Aufl., Springer 2001
- Mertens: Integrierte Informationsverarbeitung, 2 Bde., Bd.1, Operative Systeme in der Industrie, 16. Aufl., Gabler 2007
- Wigand et al.: Introduction to Business Information Systems, Springer 2003

Learning outcomes:

After attending the lecture, exercises and tutorials students are able to:

- Model complex business processes based on popular modelling techniques
- Discuss the requirements, characteristics and effects of integrated information systems in industrial companies, including complex process interdependencies
- Complete basic tasks from different functional areas in a wide-spread integrated information system.

Prerequisites:

Required: -

Recommended: -

Obligatory registration: no

2.4 Management

Module: MAN 301 Strategic and International Management			
Contents: In the lecture MAN 301, basic theories, research results and current topics from the fields of strategic and international management will be mediated. An understanding of basic functions of management will be developed and the necessary steps/instruments of a strategy development process are presented to the students. Furthermore, topics like corporate social responsibility, internationalization strategies as well as fundamental aspects of global value chain management will be treated.			
Learning outcomes:			
<ul style="list-style-type: none"> • Students will develop a fundamental understanding of the challenges and complexity of problems related to strategic management issues. They also will learn about potential solutions to strategic corporate problems. • Students will get introduced to central challenges related to global value chain management • Students will develop an understanding and get to apply central concepts/instruments of strategic and international management. 			
Prerequisites:

Range of application	B.Sc. Business Administration		

Module: MAN 401 Organization and Human Resource Management

Contents:

The lecture is based on the lecture MAN 301 and mediates the continuative topics and problems for management. Knowledge which is required for management will be mediated.

Behavior in Organizations

Development of motivation and satisfaction in individuals in organizations; development of behavior in, by and between groups; development of corporate cultures and how they influence the behavior of individuals

Organization

Organizational structures and processes as well as their transformation

Human Resource Management

Students are supposed to understand the goals and fields of activity of human resource management as both a strategic and operative management function as well as learn about methods to evaluate human resource interventions.

The following topics are discussed:

Introduction to the human resource environment; personnel selection; performance management; Compensation; Employee Relations; Leadership

Learning outcomes:

Students are able to understand and independently convey the presented concepts and contents as well as analyze them critically. By the end of the course, students will be able to apply their newly gained knowledge in practical situations. In this relation, they are able to understand the various management functions as well as their connections.

Prerequisites:

2.5 Marketing

Module: MKT 301 Designing the Marketing Mix			
Contents:			
<ul style="list-style-type: none"> • General basics • Theoretical perspective: introduction to consumer behavior • Information-related perspective: the fundamentals of market research • Instrumental perspective: <ul style="list-style-type: none"> - the fundamentals of product management - the fundamentals of price management - the fundamentals of communication management - the fundamentals of sales management 			
Learning outcomes:			
<p>Students gain a thorough overview on the relevant questions and functions in marketing. They can choose and apply suitable concepts and methods in order to solve typical marketing challenges and problems. They have a profound understanding of causal relationships and are able to solve problems quantitatively when appropriate data is available. In solving and presenting a team case study, students also improve their analytical, presentation, and team-working skills.</p>

Module: MKT 401 Strategic Marketing and Marketing in Specific Industry Contexts

Contents:

- Marketing strategy
- Marketing in specific contexts (service, business-to-consumer marketing, business-to-business marketing, international marketing)
- Customer segmentation, positioning and approach of target audience

Learning outcomes:

- Students are able to apply marketing-specific knowledge, to identify and solve problems of marketing strategy and in the institutional marketing contexts (services, B2C, B2B and international markets)
- Students are aware of cultural differences and characteristics and understand their influences for corporate processes and marketing
- Students understand ethical and social implications on corporate decisions
- Students understand the strategic and institutional perspectives and will be able to develop and implement marketing strategies

Prerequisites:

Required: -

Recommended: MKT 301 Marketing I

Obligatory registration: no

3. Economics

Module: ECO 301 Basics of Economics

Contents:

This lecture introduces into the field of economics and explains basic phenomena, interconnections and methods of analysis pertaining to micro- and macroeconomics.

The lecture introduces into the principles of economic thinking. The participants will be made familiar with the basic problems of micro- and macro-economics, especially the functioning of markets, the economy of the public sector, the labor market economy and the macro-economy of closed and open political economies.

The contents of the lecture comprise:

1. Offer and demand
2. Markets and affluence
3. Economy of the public sector
4. Design of the tax system
5. Corporate behavior
6. Fragmentary competition
7. Labor market economy
8. Excursion to threshold regions of micro-economics
9. Empirical observations and macro-economics: economical resource accounting
10. Long-term economic development: production and growth, saving, investing and the financial system
11. Money and inflation
12. European monetary union
13. Macro-economics of open political economies
14. Short-term economic fluctuations
15. Macroeconomic politics

Learning outcomes:

Successful students know the basic principles of economic thinking. They can apply them in order to analyze the impact of different simple politico-economic measures and to evaluate which impacts are socially desirable. They can use their knowledge about the effective incentives in economic processes to advise in technically sound manner layperson in moderately complex economic and political decision problems. They are able to formulate field-related positions on current social problems (like e.g. the economic and financial crisis) and to discuss possible solutions with experts.

Prerequisites:

Required: -

Recommended: -

Obligatory registration: no

Module: ECO 302 Microeconomics A**Contents:**

The goal of this lecture is to impart students the functioning and the welfare characteristics of competitive markets. Discussed in detail are the household theory, decisions under uncertainty, inter-temporal decisions, producer theory, partial and general equilibrium as well as the welfare economy. With numerous applications, special emphasis is put on the practical training of the methodological knowledge. The technical aspects will be deepened in exercises and lecture assignments.

In contrast to the lecture Microeconomics B the focus of Microeconomics A lies on the analysis of non-strategic behavior. The mediated basics of Microeconomics A are essential for many further lectures in business administration and economics.

Learning outcomes:

Students are able to not only take an individual perspective in the analysis of social problems, but also recognize the interaction of individuals as an important factor. The students have begun to think in equilibriums. After the completion of the lecture, students are able to reproduce the acquired theoretical knowledge and to apply it to related problems. Furthermore, they have dealt with the model of the competitive market and recognized among which conditions the underlying assumptions are not appropriate. They are able to deepen their knowledge in continuative lectures and independently respectively.

Through the low number of participants in the exercises and through the online-forum, interaction between students and lecturers is encouraged. Within the resultant discussions, students improve their ability to formulate subject-related positions and defend them with arguments.

5. Electives

5.1 Electives A

In elective A students can choose one out of the following modules in the field of Business Administration, Law, and Economics.

5.1.1 Business Administration

5.1.1.1 Accounting & Taxation

Module: ACC 450 Principles of Group Accounting			
Contents: The course covers the preparation and interpretation of consolidated financial statements based on IFRS and German GAAP. All consolidation and elimination entries necessary to combine the separate balances and to eliminate the intercompany transactions are introduced.			
Learning outcomes: Participants of the course gain an overview of the major concepts and methods in the fields of group accounting. Students know the regulations for group accounting. Based on these regulations, students are able to prepare consolidated financial statements. They learn how consolidation methods impact the consolidated financial statement and are able to interpret group reports.			
Prerequisites: Required: - Recommended: -			
Obligatory registration: no		Further information on registration:

Range of application	B.Sc. Business Administration		

Module: TAX 450 Taxation of Multinational Firms**Contents:**

Businesses operating within and across the borders in Europe or other regions are confronted with heterogeneous tax systems despite EU-wide tax harmonization efforts. Therefore, businesses have to adapt their organisation, finance and channels of distribution to the range of tax conditions in different countries and aim to optimise their tax situation by considering other business objectives.

The guidelines regarding the taxation of businesses in the European Union and in the Asian Pacific region are presented. The topics vary from the basic principles of the dual system of business taxation, the taxation of corporations and their shareholders and the taxation of partnerships to the impact of different corporation tax systems on financing decisions. Furthermore, the guiding principles of international taxation regarding inbound and outbound investments are discussed. Finally, based on this, several tax planning strategies for cross-border investments are introduced by various case studies (e.g. cross-border financing and implementation of holding companies).

Learning outcomes:

- Understand and evaluate the consequences of taxation when undertaking national transactions and decisions;
- Understand and evaluate the consequences of taxation when undertaking international transactions and decisions;
- Understand and identify the key tax issues that affect international business transactions.

Prerequisites:**Required:** -**Recommended:** -**Obligatory registration:** no**Further information on registration:**

5.1.1.2 Finance

Modul: FIN 450 Consumer Finance			
<p>Lerninhalte: Die Veranstaltung bietet eine Einführung in das Themenfeld „Consumer Finance“, das die Spar- und Investitionsentscheidung privater Haushalte sowie deren Umgang mit Finanz-instrumenten beinhaltet. Finanzielle Entscheidungen zählen zu den wichtigsten, aber auch komplexesten Aufgaben, mit der sich Haushalte heutzutage konfrontiert sehen. Das betrifft einerseits Anlagen in verschiedenen gängigen Finanzprodukten wie Aktien, Fonds und Anleihen, sowie andererseits Kreditentscheidungen für Konsum oder Immobilien. Einflussfaktoren wie kognitive Fähigkeiten, Erfahrung, Finanzwissen, Kultur, Alter oder Geschlecht werden diskutiert. Die Rolle des sozialen Umfelds, der Medien, der Beratung und der Finanzindustrie werden ebenfalls aufgegriffen. Ein weiterer Schwerpunkt der Veranstaltung liegt auf dem Thema Altersvorsorge, mit den Bestandteilen Sparpläne, Annuitäten, privater und gesetzliche Rentenversicherung, sowie der Diskussion von Sparverhalten und life-cycle Modellen.</p>			
<p>Lern- und Qualifikationsziele:</p> <ul style="list-style-type: none"> • Die Studierenden haben einen Überblick über die in Consumer Finance aktuell diskutierten Forschungsfragen, die verwendete Methodik und die erzielten Ergebnisse • Sie verfügen über eine interdisziplinären Perspektive, die Erkenntnisse aus der Finanzierung, VWL, Psychologie und den Verhaltenswissenschaften verbindet • Erlernen des Umgangs mit wissenschaftlichen Originalaufsätzen sowie deren kritischer Analyse • Die Studierenden haben Kenntnisse über institutionellen Merkmalen von Sparprodukten und Rentensysteme in einem internationalen Kontext

Verwendbarkeit	B.Sc. Betriebswirtschaftslehre, B.Sc. Volkswirtschaftslehre		

Modul: FIN 452 Corporate Governance**Lerninhalte:**

Aufgrund der Separation von Eigentum und Kontrolle können sich im Unternehmenskontext verschiedene Interessenkonflikte ergeben. Corporate Governance hat zum Ziel ebendiese Interessenkonflikte abzumildern bzw. zu eliminieren. In der Vorlesung werden zunächst grundlegende theoretische Konzepte der Corporate Governance vorgestellt. Im Anschluss daran werden diverse Corporate Governance Mechanismen (z.B. die Eigentümerstruktur oder das „board of directors“) vorgestellt. Dabei wird die Wirksamkeit dieser Mechanismen anhand von empirischen Studien kritisch diskutiert.

Lern- und Qualifikationsziele:

- Die Studierenden sollten ein grundsätzliches Verständnis für wichtige Fragestellungen aus dem Bereich der Corporate Governance entwickeln und deren Relevanz im gesellschaftlichen, politischen und ökonomischen Kontext bewerten können.
- Die Studierenden erhalten einen Überblick über die im Bereich der Corporate Governance diskutierte Forschungsfragen

Voraussetzungen:**Formal:** -

Inhaltlich: Studenten sollten Kenntnisse im Umfang eines Einführungskurses in Finanzierung besitzen (z.B. FIN 301). Basiswissen in Ökonometrie ist hilfreich für das Verständnis der vorgestellten empirischen Arbeiten.

Anmeldepflicht: ja	Weitere Infos zur Anmeldung:

Module: FIN 452 Corporate Governance

Contents: In this course, conflicts of interest within the firm will be analyzed and mechanisms to mitigate these problems discussed. First, the lecture starts with the theoretical concepts underpinning corporate governance. Second, emphasis will be on different corporate governance mechanisms (for example ownership structure, executive compensation and the role of the board of directors).			
Learning outcomes: <ul style="list-style-type: none"> • Students should develop an understanding of important issues in corporate governance and of its relevance in a social, political, and economic context.

5.1.1.3 Information Systems

Module: IS 450 Fundamentals of E-Business

Contents:

In the last years, the internet has rapidly become an important and fast growing aspect of business life. It is a channel to the customer, a medium to link up with the suppliers, a marketing tool and an interactive medium for communication. Consequently, today's manager needs a profound knowledge of the strategic implications of using the internet for the goals of the firm. Based on the content of the introductory courses on information systems and marketing it is the aim of this elective module to equip the participants with strategic insights into the following aspects of e-business impact:

Fundamental terms and issues of e-business, technological and process-oriented view on e-business, social and behavioral issues of e-business, ethical and regulatory aspects, strategies to employ the digital channel, digital marketing, product and service innovation, reshaping business processes through e-business..

Textbook: Jonathan Reynolds, *E-Business, A Managerial Perspective*, Oxford University Press, 2010

Learning outcomes:

Students will

- understand the impact of e-business and modern business models on supply chains
- gain insights in up-to-date business strategies
- engage in social media for marketing, customer relationship management and customer satisfaction
- discuss socio-cultural aspects of e-business and social media

Prerequisites:

Required: -

Recommended: -

Obligatory registration: no

Range of application	B.Sc. Business Administration

Module: IS 451 Technical Fundamentals of Information Systems**Contents:**

This lecture teaches technical basics of information systems and addresses students that want to gain technical knowledge of information systems for IT-related jobs or Master studies.

The lecture covers basic principles of a computer's operations and programming, and gives an introduction to standard algorithms, data structures, and networking. Based on IS 301, the lecture further introduces into software engineering. Topics of the lecture are:

- Basics of digital computers
 - Binary system, data representation
 - Information processing, programming
- Basics of algorithms
- Typical problems of information processing
 - Algorithms for searching and sorting of information
 - Data structures, e.g., arrays, trees, lists, hashing, graphs
 - Complexity estimation
- Distributed systems and computer networks
- Software engineering: basics and interfaces to the departments
 - Development processes
 - Requirements analysis

Learning outcomes:

Participants of the lecture acquire skills in:

- basic concepts of computers,
- basic knowledge of algorithms,
- basic algorithms for searching, sorting and data structures,
- computer networks and distributed systems and
- the procedure of software engineering.

5.1.1.4 Management

Module: MAN 450 Entrepreneurship, Innovation and Business Model Design

Contents:

The course `Entrepreneurship, Innovation and Business Model Design´ introduces concepts of creativity and entrepreneurship and models which facilitate their translation into business models. The course introduces students to the more practical elements of innovation and enterprise activity across multiple contexts along with the exploration of students' own entrepreneurial potential.

This course focuses on two main themes: encouraging students to investigate and experience creative processes and preparing students to implement innovative ideas in the marketplace.

Learning outcomes:

By the end of the module students will have:

- explored and developed their own entrepreneurial creativity
- invented and presented a new business idea
- experienced and applied a six stage creative problem solving process
- developed skills and abilities that can be applied to improve your effectiveness in the rest of your studies
- developed a business plan for a concrete start up project
- presented and defended the concept of their start up project in front of an expert board to get feed back

Module: MAN 451 Introduction to Nonprofit Management

Contents:

This module gives an introduction to the management of nonprofit organizations (NPOs). First, the nonprofit sector is described and analyzed, including topics like the relevance of the sector and its various activity fields. In the following, nonprofit management is reviewed within the functions of nonprofit governance and leadership, nonprofit human resource management, nonprofit marketing, fundraising management, nonprofit accounting and finance and nonprofit partnerships. Thus, this module provides a theoretical foundation for the management of NPOs. The peculiarities of nonprofit management as opposed to “forprofit” management are developed and analyzed. Possibilities and limits concerning the applicability of general management methods and concepts to NPOs are detected. Scientific research pertaining to nonprofit management is discussed and practical examples, cases and project work are presented. .

Learning outcomes:

By the end of the module students will be able to:

- illustrate the economic relevance of the nonprofit sector,
- explain the particularities of nonprofit management,
- apply general management methods in the nonprofit sector
- describe the development of specific concepts for NPOs,
- explain hypotheses and findings in the field of non-profit management.

Moreover, key competences such as presentation competence, working with academic papers and team competences shall be acquired.

Module: MAN 452 Introduction to Public Management

Contents:

In this module, we elaborate on framework conditions and theoretical foundations of public management. We describe the work of public administrations by applying a management perspective. The module contains topics such as public tasks, management of public services, and public-private partnerships. Human resource management in and organization of public sector entities are particularly discussed. In this context, we talk about the possibility to apply management instruments in public administrations in the light of current reform movements in the public sector.

Learning outcomes:

By the end of the course, students should be able to:

- explain framework conditions as well as theoretical fundamentals of public management,
- describe possibilities and limitations of transferring business and market-oriented instruments to public administrations,
- discuss contents of current reform movements.

Moreover, key competences such as presentation competence, working with academic papers and team competences shall be acquired.

5.1.1.5 Marketing

Module: MKT 450 Marketing Communications			
Contents: Marketing communications is concerned with the methods, processes, meanings, perceptions and actions associated with the ways in which organizations (and their brands) engage with their target audiences. The lecture covers all elements of the communications mix, including advertising, public relations, sponsorship, sales promotion, direct marketing, point-of-purchase communications, exhibitions, and personal selling.			
Learning outcomes: 1) Understanding of what Marketing Communications is and how it works 2) Understanding of the different process steps of marketing communications (planning, organization, execution, monitoring of communication actions). 3) Knowledge of the various aspects and perspectives of marketing communications (i.a., advertising, public relations, sponsoring, sales promotion, direct marketing). 4) Develop the ability to criticize various communication instruments and their application.

5.1.1.6 Operations

Module: OPM 450 Fundamentals of Service Operations Management

Contents:

Services are the largest and fastest growing segment of our economy. However, services pose particular challenges to managers due to their process-oriented nature, perishability and high levels of customer involvement. This course provides basic managerial concepts and analytical tools for effectively and efficiently managing service operations in order to gain competitive advantage in face of these challenges.

In particular, we will create models and use software such as state-of the-art spreadsheet tools to analyze and solve different operations management problems typically arising in service industries. The methods and tools taught in the course have become invaluable aids to informed decision making in practice in order to improve processes, save resources, and create value.

Applications cover a broad range of service industries, such as transport and communication, retailing, hospitality, professional services, health care, service functions of the manufacturing sector, etc. The course pursues an active-learning approach including lecture-style class sessions, computer-based exercises, and home assignments to be accomplished in teamwork.

Learning outcomes:

Students will

- get familiarized with the challenging decisions and problems in service operations management,
- understand the key differences between the service and the manufacturing sector and the implications for managing services vs. goods,
- learn about concepts and tools for analyzing decision situations and for systematically evaluating options in service operations management,
- enhance their problem structuring, modeling and analytical skills.

5.1.3 Economics

Module: Macroeconomics A			
Contents:			
a) Economic Growth: saving, interest rates and capital accumulation; technological progress; human capital; money, inflation and economic growth.			
b) The Labor Market: unemployment; wages and salaries; technological progress and wage inequality.			
c) The Open Economy: exports and imports; capital flows; exchange rates; globalization and economic growth; globalization and the labor market.			
d) Economic Policy: fiscal policy and tax reform; labor market reform; social security reform; health reform.			
Learning outcomes:			
Successful students will know the basic principles of macro-economic thinking. They will be able to apply them in order to analyze the effect of differing economic-political measures as well as to evaluate what kind of measures would be socially desirable. They will use their knowledge on macro-economic theory and empiricism for the purpose of commenting on contemporary macro-economic issues in a professionally substantiated manner. Furthermore, they will be able to formulate suggestions for improvement concerning the overall economic situation and discuss them with representatives of the discipline.

Range of application	B.Sc. Business Administration		

5.2 Electives B

In Elective B students can select one course in the field of managerial skills. The courses will be offered by the center for key qualifications (“Zentrum für Schlüsselqualifikationen”) and specified before the beginning of the semester.

Module: Various modules in the field of “managerial skills”			
Contents: Depending on enrollment, the area provides basic knowledge on subjects of occupational competence, expertise, methodological competence, and soft skills.			
Learning outcomes: Students will learn about specific mechanisms, procedures and methods within the selected subject area and apply them in an adequate manner. Thus they will learn how to orient themselves within complex organizations. This course aims at preparing students for their future career in an institution or business, so that they may act according to specific situations in order to be able to tackle problems confidently and to develop solution strategies.			
Prerequisites: Required: - Recommended: -			
Obligatory registration: yes		Further information on registration: Student portal	
Courses	Hours per week	Self-study	ECTS
Block seminar	1	1	1
ECTS in total			1
Form of assessment	Participation		
Lecturer/Person in charge	Various lecturers (business experts)		
Duration of module	1 semester		
Offering	Spring semester		
Language	German/English		
Program-specific educational goals	LG 2, LG 4, LG 5, LG 6		
Range of application	B.Sc. Business Administration		

6. Ethics and Rhetoric

Module: CC 305 Presentation Skills and Rhetoric			
Contents: This module will convey via an integrated model (the contextual framework consists of a business administration perspective) the relevant methods of presentation and the rules of public speaking.			
Learning outcomes: By the end of the seminar, students will be in a position to undertake presentations in a confident and engaging manner. They will have gained an insight into the relevant methods of presentation and will be able to apply these in an appropriate manner. Furthermore, they will be familiar with the rules of public speaking and will be able to structure a paper in an audience-friendly and transparent manner.

Range of application	B.Sc. Business Administration

7. International Studies

The module International Studies makes a distinction between the study abroad semester and the studies at the University of Mannheim.

Usually, the students in their fifth semester study abroad. The study abroad semester, enables the students to educate themselves further and to specialize, as well as to expand and deepen their general knowledge by taking classes from other fields. Depending on the host country, the students complement or improve their foreign language skills and learn how to get in contact with other cultures and mentalities.

Under special circumstances students can be exempt from the study abroad semester – in this case they are free to choose from different courses from the field of International Cultural Studies. In the lectures, individual theories of Cultural Studies will be presented exemplarily, which will be treated in detail in the following seminars. Furthermore, knowledge of the chosen foreign language will be expanded.

Detailed information can be found in the subchapters 7.1 and 7.2.

7.1 International Studies – Study Abroad Semester

Students who spend their fifth semester abroad can transfer credit for course work done abroad at their partner university from every area of business administration, as well as courses which correspond to the field of “International Studies”. For course work done there, up to 29 ECTS can be transferred (compare § 15 Examination Regulations).

Module: International Studies			
Contents: dependant on the type of course			
Learning outcomes: During the study abroad, the students can educate and specialize themselves professionally, as well as broaden and deepen their general knowledge by attending courses from other fields. Depending on the host country, the students will complement and improve their foreign language skills and will also learn how to handle other cultures and mentalities. Through the confrontation with different teaching and learning methods at the host institution and with a new environment, the academic and personal growth of the students will be advanced.			
Prerequisites: Required: - Recommended: -			
Obligatory registration: no		Further information on registration:	
Courses	Hours per week	Self-study	ECTS

Program-specific educational goals	dependant on the type of course		
Range of application	B.Sc. Business Administration		

7.2 Foreign Language Skills

Foreign language skills consist of two modules in one of the following languages chosen by the students: English, French, Spanish, Italian, Russian, Japanese and Chinese.

According to the foreign language chosen by the students, the module provides basic/advanced knowledge in regard to (economic) technical skills as well as regional knowledge. In this connection, the focus lies on the encouragement of communicative competencies and language skills in varying contexts.

In order to be accepted for the respective languages, acceptance and placement tests will be carried out during the first semester. The number of participants in the different languages is restricted (with the exception of English).

Foreign Language Skills I and II

a) Chinese

Students choose, depending on their existing language level, either the modules Chinese I and II or Business Chinese I and II (<http://chinesisch.bwl.uni-mnnheim.de>).

Module: Foreign Language Skills I: Chinese I			
Contents: In this course, students will acquire basic knowledge of modern Chinese in regard to listening comprehension, speaking, reading and writing. The focus areas are Chinese phonetics, Chinese characters and grammar.			
Learning outcomes:			
<ul style="list-style-type: none"> • Acquisition of thorough basic knowledge of the modern Chinese language • Acquisition of Chinese characters • Command of Chinese everyday conversation 			
Prerequisites:			
Required: -			
Recommended: -			
Obligatory registration: yes		Further information on registration: Student portal	
Courses	Hours per week	Self-study	ECTS
Lecture	2	2	2
(additional offer: Exercise)	(2)		
ECTS in total			2
Form of assessment	Written and/or oral exam; the examiner will determine the exact form in accordance with the requirements of the module element.		
Lecturer/Person in charge	Mrs. Didi Zhang		
Duration of module	1 semester		
Offering	Spring semester		
Language	Chinese and German		
Program-specific educational goals	LG 1, LG 6		
Range of application	B.Sc. Business Administration		

Module: Foreign Language Skills II: Chinese II**Contents:**

In this seminar, the basic language skills acquired on level I are further expanded. The competencies in listening and speaking, as well as in reading and writing are intensified and enhanced. In addition, the students learn about history, regional and cultural studies and communication skills.

Learning outcomes:

- Improvement of listening comprehension, oral expression, reading comprehension and written expression.
- Extension of general language skills
- Achievement of level A2 of the “Common European Framework of Reference for Languages”
- Consolidation of cultural and historical knowledge
- Acquisition of communication skills and strategies in negotiations

Prerequisites:

Required: Foreign Language Skills I

Recommended: -

Obligatory registration: no

Further information on registration:

(Additional offer: Exercise)	(2)		2
(Additional offer: Seminar)	(2)		
ECTS in total			2

Form of assessment	Written and/or oral exam; the examiner will determine the exact form in accordance with the requirements of the module element.
Lecturer/Person in charge	Mrs. Didi Zhang
Duration of module	1 semester
Offering	Fall semester
Language	Chinese and German
Program-specific educational goals	LG 1, LG 6
Range of application	B.Sc. Business Administration

Apart from the two obligatory courses in two semesters, further courses in general Chinese will be additionally offered in the fourth semester (spring semester). Thus the students can achieve level B1 of the “Common European Framework of Reference for Languages” and can therefore take the worldwide recognized HSK exam (Hànyǔ Shuǐpíng Kǎoshì). Participation is highly recommended in order to facilitate the acclimatization process and to increase chances to study later in China or to help in a future career.

Module: Foreign Language Skills I: Business Chinese I

Contents:

In the lecture, technical terminology in Chinese for economic purpose, like e.g. negotiations, newspaper articles, analysis of an economic event etc., will be presented. In addition, the already acquired general knowledge in Chinese will be expanded and deepened.

Learning outcomes:

- Improvement of listening comprehension, oral expression, reading comprehension and written expression.
- Acquisition of knowledge in Business Chinese

Prerequisites:

Required: -

Recommended: Advanced skills in Chinese are required.

The seminar is directed at students, whose knowledge of Chinese is in line with level C1-C2 of the “Common European Framework of Reference for Languages” and who would like to improve their Chinese in general as well as subject-specific.

Obligatory registration: yes

Further information on registration:

b) English

The courses are offered by the School of the Humanities (area: *Anglistik für Wirtschaftswissenschaften*: http://www.anglistik.uni-mannheim.de/anglistik_fuer_ww/startseite/index.html)

Module: Foreign Language Skills I: Current Topics			
Contents:			
<ul style="list-style-type: none"> • Development of a technical vocabulary with an emphasis on economy and politics • Basic principles of research, processing and evaluation of news • Contextualizing of selected aspects of the contents taught in the economic lectures • Provision of regional topics • Encouragement of listening and reading comprehension as well as oral and written capability of expression 			
Learning outcomes:			
Students acquire apart from the competent handling with different news media the critical treatment of current topics from the fields of politics, society and economy. This includes research according to basic scientific rules and the comparison of different sources, as well as the critical examination with varying approaches and culturally coined views. Apart from the acquisition of technical economic vocabulary, the goal of this seminar is the fortification of the communicative competencies and language skills in their respective contexts.			
Prerequisites:

Lecturer/Person in charge	Jennifer Bauer/ Christiane Koch		
Duration of module	1 semester		
Offering	Spring and fall semester		
Language	English		
Program-specific educational goals	LG 6		
Range of application	B.Sc. Business Administration		

Module: Foreign Language Skills II: International Business Communication

Contents:

- aspects of intercultural communication in the business world: critical situations and case studies; key words of intercultural communication; short presentations by participants about selected business cultures
- communication strategies for meetings and negotiations (with the help of simulations or respectively, smaller case studies)
- training of the structures of English business correspondence and the written communication within a corporation (letters, e-mails, memos)
- training and deepening of important grammatical constructions and technical terms for the communication in the business world

Learning outcomes:

On the one hand, students acquire practice oriented skills (writing business correspondence, preparation and execution of meetings and negotiations), on the other hand, their intercultural and communicative competence will be encouraged in order to secure successful social interaction with the English-speaking business world. In this connection, a special focus lies on the fortification of the communicative and social competencies and the acquisition of communication techniques and negotiation strategies.

- Extension of vocabulary (about 600 Words) and the knowledge of Kanji (80 characters)
- Improvement of listening comprehension and oral communication skills in everyday situations like shopping, visiting a hospital, directions
- Acquisition of the basic honorific speech “Keigo”
- Preparation for studies at a Japanese university

Prerequisites:

Required: Foreign Language Skills I

Recommended: -

Obligatory registration: no

Further information on registration:

Courses	Hours per week	Self-study	ECTS
Seminar	2 (additional offer: 4 hours per class/week)	2	2
ECTS in total			2

Form of assessment	Written exam (general language test (90 min., 75%)) as well as exam of the active Kanji (60 min., 25%)); the examiner will determine the exact form in accordance with the requirements of the module element.
Lecturer/Person in charge	Ryoko Aoyagi
Duration of module	1 semester
Offering	Fall semester
Language	Japanese and German
Program-specific educational goals	LG 6
Range of application	B.Sc. Business Administration

In addition to the compulsory modules, which span over 2 semesters, further elective courses are offered. This is necessary, because the workload with Japanese in comparison to other

(western) languages is substantially increased, due to a more complex writing system. Especially for students without prior knowledge, it is very difficult to learn the Japanese language in the time frame of the B.A. studies to a degree which allows unproblematic studies at a Japanese university.

The additional intensive language courses are offered in the 2nd and 4th semester (in each case: spring semester).

e) Italian

The courses are being offered by the School of the Humanities (Romance Studies: <http://www.phil.uni-mannheim.de/romsem/startseite/index.html>).

Module: Foreign Language Skills I: L'italiano per gli affair I			
Contents:

Foreign Language Skills I and II

For detailed information on the modules of the Foreign Language Skills I and II, c.f. previous chapter.

Foreign Language Skills III

If a third, continuative foreign language module in business language will not be offered in the language option originally chosen by you, you have to select, where appropriate, a complementary partial module from the Foreign Language Skills in **English**. The courses will be offered by the School of the Humanities (<http://www.phil.uni-mannheim.de>).

In the languages **French** and **Spanish**, students with very strong skills in business language can attend courses in the language program of the School of the Humanities. Alternatively, other general-language courses can be attended.

In the language **Italian**, it is possible to attend general-language courses on the advanced level.

In the **Russian**, it is possible to attend a course on modern business communication on an advanced level.

Likewise, the specialization **Chinese** offers a course on an advanced level that treats in particular economic terminology (<http://chinesisch.bwl.uni-mannheim.de>).

Module: Foreign Language Skills III: English			
Contents: <ul style="list-style-type: none">• Development of an expanded, well-founded technical vocabulary• Specific spoken language training• Presentation of terminology from the field of media, politics and society• Presentation of cultural and historical contents (USA, Canada, Great Britain, Ireland and Australia)			
Learning outcomes: <p>In the course of this lecture, related to the Anglophone world, the main focus lies on the consolidation of the specific cultural competencies in addition to the continual expansion of a well-founded terminology in relation to cultural studies. In this third module, students are supposed to become familiar with national characteristics from history, politics and society.</p>
