

Internal Research Seminar		
Contents:		
<p>The key focus of the research seminar is the development of initial research ideas and ongoing research projects into paper submissions to leading management journals. For this purpose, doctoral students and post-docs present the current status of their projects and receive constructive feedback on how to further improve the theoretical and empirical rigor of their work.</p>		
Learning objectives		
<ul style="list-style-type: none"> - Become familiar with the publication process - Learning how to prepare submissions for top-level scientific journals - Improve presentation skills for talks at international research conferences and symposia - Acquire advanced skills regarding research database management - Hone abilities in data collection, processing and analysis
