

## MAN 605 – Mastering Complexity in Organizations – How to navigate through the complexity of our times

<b>Examiner</b>	Prof. Dr. Karin Hoisl
<b>Lecturer</b>	Dr. Sebastian Hetzler
<b>ECTS</b>	6
<b>Hours/week</b>	4 + self-study
<b>Content</b>	<p>Complexity is the main challenge of management in the 21<sup>st</sup> century. Only those organizations that know how to use complexity and rapid change intelligently to create and defend competitive advantages will thrive in the long run.</p> <p>This course equips students with the theories, concepts and tools to be successful in the age of fast change and multiple options. It is a comprehensive introduction into the world of systems, cybernetics, and artificial intelligence. Students will learn about the basic concepts of complex adaptive systems like variety, connectedness, emergence, and self-organization. They will understand how cybernetics, the science of communication and control, can help them to design adaptive and resilient organizational structures that scale. They will discover how the human brain copes with complexity and how computers and artificial intelligence can improve individual and group decision-making processes in complex environments.</p> <p>This course provides both theoretical foundations and practical applications, endowing students with the skills to effectively navigate and manage complexity in a variety of</p>
