

## Student Research Assistant Position as Data Scientist

Our research team at the Chair of Organization and Innovation, is looking for a data scientist for **10 hours a week**. The contract can start as early as possible and lasts for **6 months**, with a potential half-year extension. Besides completing assigned coding tasks independently, the job entails bi-weekly data presentation sessions with the research team. The ideal candidate has **strong programming skills** and is interested in academic research in the domain of innovation management. Although not required, it is beneficial if the candidate has a personal interest in academia and considers using this contract as part of a **pre-doctoral** experience.

### What you can expect:

- Participation in academic research on the **sociology and economics of innovation**
- Friendly working environment and high degree of **autonomy**
- **Flexible** working hours

### What we expect:

- Highly **committed and reliable** team player
- Excellent communication skills and fluency in **English**
- High interest in the fields of **innovation**
- Above average academic achievements
- Experience and skills in **NLP, Topic Modelling, Data Analysis, Data Modelling**, preferably in **Python** and/or **R**.
- Command of the statistics software **Stata** is a plus

### Conditions:

- Start: as soon as possible (latest March 2024)
- Long-term employment-relationship preferred
- Approximately 40 hours per month
