### Course

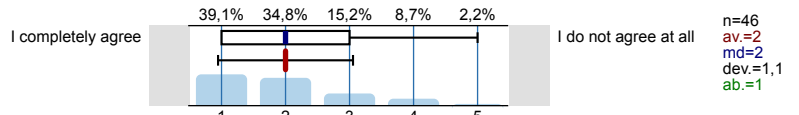

The course contents were very well structured.

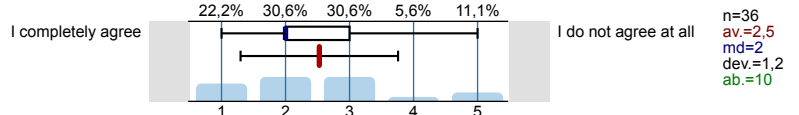

The course contents were illustrated very well by using appropriate examples.

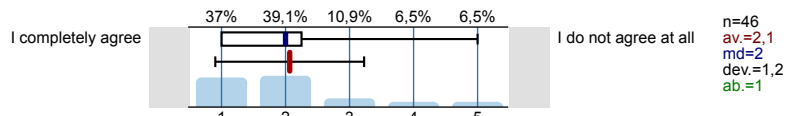

The instructor motivated me.

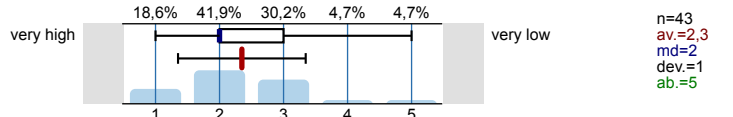

The instructor encouraged the open and creative participation of students.

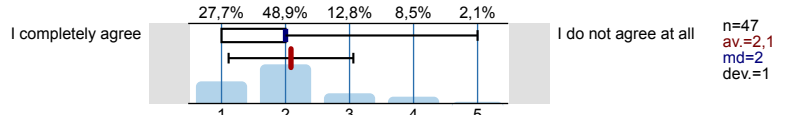

The instructor demonstrated a high level of commitment in this course.

In relation to the number of ECTS credits I receive, the average workload for this course is ... (One ECTS credit corresponds to an average workload of approx. 30 hours.)

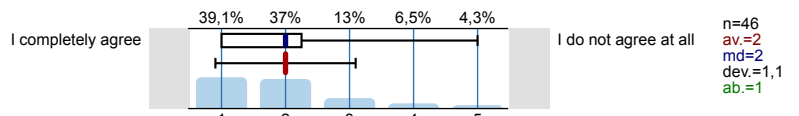

I had sufficient previous knowledge to follow the course.

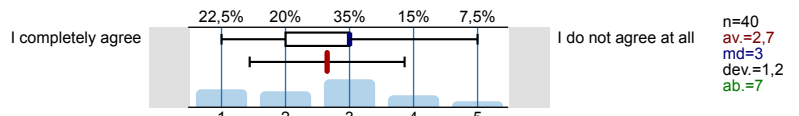

### Teacher

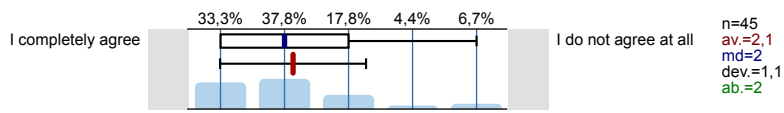

Instructor's explanations were clear.

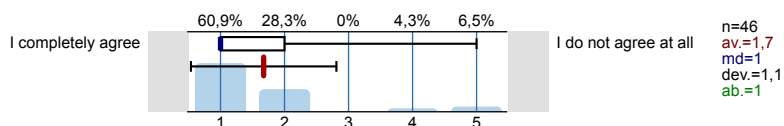

Students were encouraged to form an opinion on the content of the course.

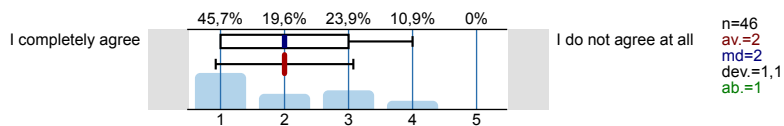

Proposed objectives agreed with those actually taught so I knew where course was going.

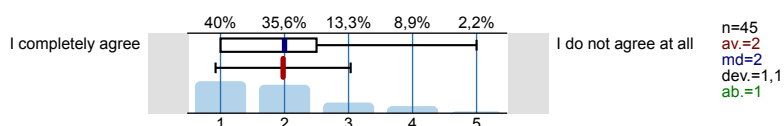

The instructor was well-prepared with regard to the content of the course.

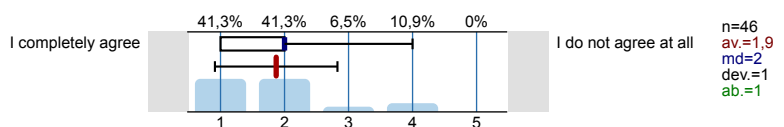

The material distributed (literature, slides, etc.) helped me acquire the knowledge.

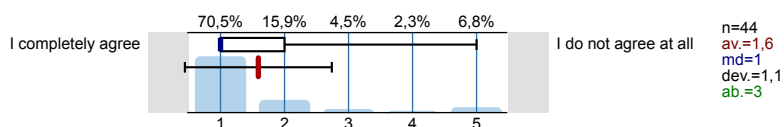

The instructor created a link between theory and practice.

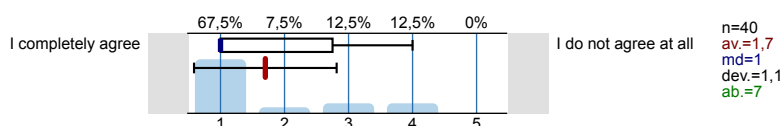

The instructor conveyed why the content is valuable and useful.

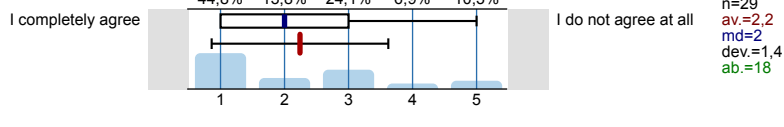

The instructor was polite with the students.

The instructor was cooperative and open-minded.

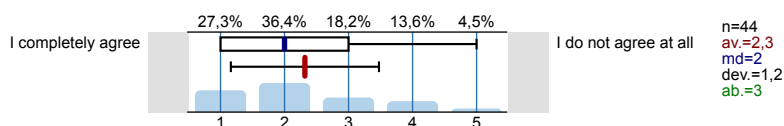

Evaluation criteria were transparent.

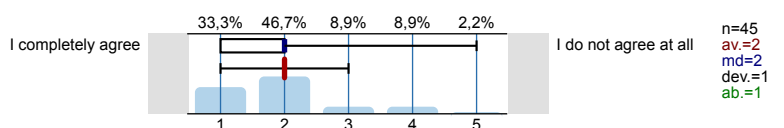

Learning Outcome

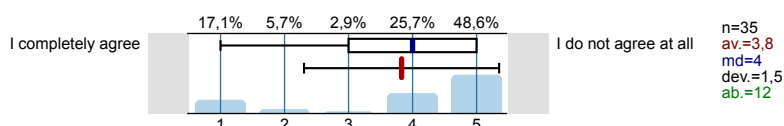

I improved my methodological competence thanks to this course.

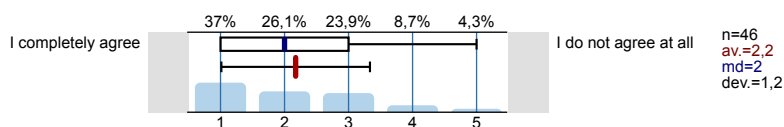

I improved my professional competence thanks to this course.

I improved my presentation skills thanks to this course.

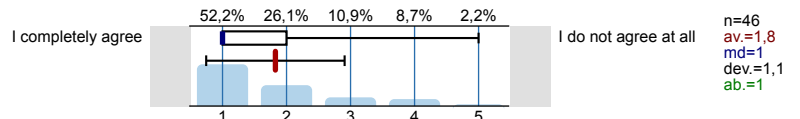

My interest in the subject has increased as a consequence of this course.

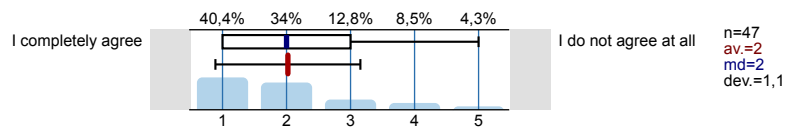

Overall

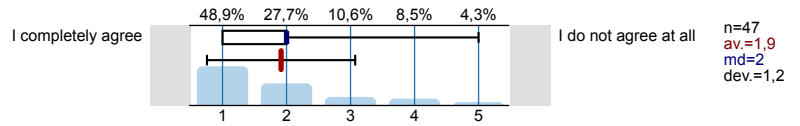

Overall, I am very satisfied with the instructor.

Overall, I am very satisfied with the course.

I learned a lot in this course.

# Profile

## Open Questions

What did you particularly like about this course?

- + very friendly and professional professor  
+ good communication with the students
- First of all, I love the literature (BMA), that books was of such help and the content is so well explained, I am really hapy to have found that book through this course, and intend on reading all other chapters too, so I recommend to keep using the book as the foundation Secondly I really liked the instructor, because you really got the feeling he knows what he´s talking about. And so finally I am to this point very content with this course, compared to all the other workload we have this semester, this is one of the courses I gladly attend to.
- Great Team!  
Really helpful examples in the lecture.  
I love the enthusiastic manner in which the Professor Maud and the Team guide us through the lecture.  
The exercise ist extremely helpful and structured really well! Jan is awesome at reviewing the lecture and drawing out most important aspects. Having the exercise really makes a huge difference!
- I'm generally interested in Finance and that's why like learning more about it. I also like that there's not a lot of theory only.
- That there are only lecture and exercise to be watched and in combination with the book that is plenty of contents to learn and not be overwhelmed
- The Finance Courses are still among the clearest and best structured courses. Just enough material to understand everything and no exhausting overqork and searching like in other subjects.
- The fact that is now being lectured online is extremely helpful for learning "at one's own pace".
- The link between theory and practice
- The professor
- The survey the course made and the adjustments that were made. No other course has been so cooperative and open to change/ adaption to achieve a great learning atmosphere as well as great communication inside the course.
- Well structured and good examples
- Well-structured course, engaged team in the background.
- Your team is doing an awesome job :) Keep up the good work, very grateful for all the time and energy you put into it
- digital classes were handled well (Youtube links to lecture recordings), online quiz was very helpful, exercises revised content very well
- the content is interesting

What should be improved?

- - reduce workload (BMA+ex+lec is too time consuming in relation for the ect)s  
- provide more recent old exams
- /
- I think it could be made more illustrative with real life examples of instances taking place or where we see these events in the real world.
- I think there is hardly anything that could be improved, even though I failed the previous course, I do not feel overhwlmed or out of position to understand the concepts, or unable to work with the exercises given to us.  
Great course so far.
- I would maybe recommend that the slides be a bit more visually appealing, I don´t want to step on anyone´s shoes with this, I f.e. really liked the TAX slides because they seemed very clean.  
And another recommendation would be to explain the calculation exercises a little more in detail in the lecture because I thought it was a bit difficult to then try to do similar exercises in the Tuts because in the lecture they weren´t explained very extensively
- In my opinion the topics could have been covered in greater detail, but that is probably due to my personal interest in the subject.
- It would be good to write a bit more information on the slides. This would make the repetition of the course content easier.
- More information on the slides
- More practical examples

- The explanations in the lecture should be more clear because it was often the case, that I did not really know what to calculate in the exercise
- The lecture should be more structured.  
The lecture slides are not very informativ. You have to attend the lecture and make additional notes to understand. Concerning the recap you wont understand the slides without additional information that the professor provided.  
  
Too much workload for the number of ECTS.
- Too much workload. A zoom tutorial would be a good idea.  
  
I can't understand the topic.  
Too complicated
- Try to make the differences between FIN 301 and FIN 401 a bit clearer and also where they interlink
- Would be nice if the exercise was delayed one week as it were previously the case. Easier to follow up with the content.
- more exercises in person and less online, less content because of the shorter semester, better summaries and overview, sheets with formulas, mock exams, clear information about the exam, exams in person and not online because it is unfair to do exams online (help of other people,...)
