Auswertungsteil der offenen Fragen

Auto-Gruppe

What did you especially like about the course?

- Learn effect
  Topics
- Overlap in topics allowed better discussions because one could see more issues in other participants topics
- The discussions within the group including the professor
- The instructor clearly explained new complex concepts with examples and a great step-by-step approach.
- Very interesting overview over a broad range of topics and methodologies
  Tour on methodology

What should/could be improved?

- Isn't class participation a bit overweighted in overall mark?
- More Stata support, especially at the beginning
  More hints regarding databases at the beginning (what data to extract etc.)
- Reduce the time per presentation to 30 min. In the end you just go home with the main statements not the details
- Stata should be available for free
  It would be nice if the computer would be working fine and not should down
- The instructor overteaches with his aspirations
  Replicating "non-sense" is not useful
  Workload way too much compared to other chairs
  3 day presentation is too much
  Presentations should be limited to 30 min as to take away something from presentation
- The submitted seminar papers should have been available for the participants of the seminar
- With consensus of the students it would be helpful to receive the seminar paper and presentations of the other participants.
- Would have liked to see other participants papers to prepare for seminar
