1. Course Evaluation

^{1.15)} What did you especially like about the course?

- Really liked the structure of the course, and especially the reading lists in the syllabus for each session, that is very nice to get an overview of a topic with the most important old contributions as well as some selected new work.

^{1.16)} What could/should be improved?

- As a side note: It seems unrealistic to go beyond the required readings in the readings list, at least for someone that is not planning to focus his research on corporate finance, given the general time constraint. But I guess that is a personal trade-off decision for every course participant.
