Comments Report

1. Course Evaluation

^{1.15)} What did you especially like about the course?

- Gives a broad overview of main areas of research
- I like the content of the course and the atmosphere.
- Jokes during the lecture
- Very interesting material, VERY well-chosen papers (both required readings and presentations), very nice lecture! In particular I was impressed by the intuitive explanations of seemingly complicated models and by the ability of the lecturer to spillover his enthusiasm to the whole group. The atmosphere among students and professor was super nice, not least because of the coffee break, a great thing I will copy for my block seminars as soon as I have to teach some.
Overall: amazing course! It was the only first year course so far to which I was looking forward each session. Great job, thanks a lot!

^{1.16)} What could/should be improved?

- Discussing some theoretical and methodological aspects in more detail.
- Sometimes, the lecturer interrupted student presentation very quickly, partly before even properly listening what the presenter was about to say. Even though I agree that the lecturer most times had the best (and most simple) way to explain things, he could have let the presenter try to explain properly for ten more seconds before interrupting.
- The session number could be increased
