

## Master Thesis - Circular Economy Impact Measurement at PreZero// PreZero Stiftung & Co. KG Neckarsulm

### New Thinking for a Cleaner Tomorrow.

#### Who we are.

PreZero is one of the leading environmental service providers in Europe and North America with more than 4,800 employees at over 140 locations. With waste disposal and sorting, processing and recycling, the company bundles all competences along the value chain under one roof.

PreZero thus sees itself as an innovation driver in the industry with the goal of creating a world in which resources are no longer wasted thanks to closed cycles. Zero waste, 100 per cent recyclable material. For this, we need forward thinkers and pragmatists who are ready to take responsibility and stand up for a clean tomorrow with new thinking. Become part of PreZero now!

The PreZero Stiftung & Co. KG takes over the coordination of the international PreZero Group at the Neckarsulm location. PreZero International GmbH and PreZero Dual GmbH also have their headquarters there.

#### What awaits you.

- ☐ The opportunity to participate in the overall CSR strategy development
- ☐ Professional supervision
