
Proposal for final thesis

Author

The proposal should state the underlying research question, the topic's relevance, the selected approach and the expected results. The more precise the proposal is structured and formulated, the more convenient the writing process will be.

1. Research question

Which is the essential question you want to answer in your thesis?

2. Relevance

Why is this question relevant? Why has the question not been answered yet?

Why is it possible to answer the question now?

3. Approach

What do you want to do to answer the question?

a) Theoretical foundations

On which theory/theories will your work be based?

Which hypotheses can be derived from them?

b) Research method

Which method are you planning to use?

c) Observations

What do you want to observe?

4. Expected results

What results do you expect?

5. Preliminary structure

Please supply a draft of your table of contents.

The table of contents is helpful for discussing the thesis' topic.

6. Important literature

Which are the most important sources you are referring to?
