

OPM 763	Basics of scientific writing for final theses
Language	English/German
Aim of module	Students are provided with the basic principles of scientific writing. This includes an introduction to literature research. Additionally students will get to know the formal guidelines for their final thesis at the Chair of Production Management like general style of citations, formal requirements concerning tables and figures and the structure/outline of the thesis. Beyond that students will be introduced how to structure a thesis and how to generate an opportunity for scientific contribution.
Learning outcomes	Students should be able to conduct literature research and to integrate previous work into a literature discussion. Beyond that students should learn to present research results in compliance with the standards of the Chair of Production Management.
Prerequisites	<p>Formal: Registration for final thesis at the Chair of Production Management</p> <p>Recommended: Interest in scientific writing and research methods, intent to write thesis at the Chair of Production Management</p>
