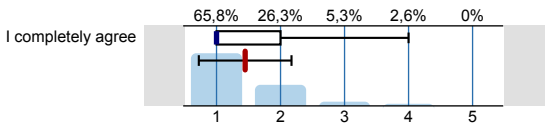
dev.=1

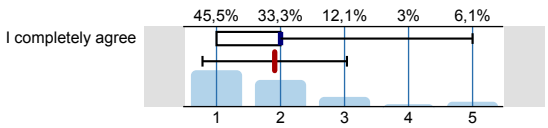
Teacher

Instructor's explanations were clear.



n=38
av.=1,4
md=1
dev.=0,7

Students were encouraged to form an opinion on the content of the course.



n=33
av.=1,9
md=2
dev.=1,1
ab.=5

Proposed objectives agreed with those actually taught so I knew where course was going.

I completely agree 
I do not agree at all

n=37
av.=1,4
md=1
dev.=0,6
ab.=1

The instructor was well-prepared with regard to the content of the course.

I completely agree 
I do not agree at all

n=38
av.=1,1
md=1
dev.=0,3

The material distributed (literature, slides, etc.) helped me acquire the knowledge.

I completely agree 
I do not agree at all

n=36
av.=1,5
md=1
dev.=0,8
ab.=2

The instructor created a link between theory and practice.

I completely agree 
I do not agree at all

n=38
av.=1,7
md=1
dev.=0,9

The instructor conveyed why the content is valuable and useful.

I completely agree 
I do not agree at all

n=37
av.=1,8
md=2

Comments Report

Open Questions

What did you particularly like about this course?

- - The lecturer is great at explaining complex concepts. His course was a great addition to the lecture since it delivered the concepts in a more comprehensible way
  - The lecturer was always very polite and encouraging
- Can did a great job.
- Can not only explained the exercises very well, but you could really observe the fun he had while teaching! It was very motivating and the explanations fostered understanding. Great job!
- Everything
- Excel part.
- Good tempo in most of the exercises and detailed explanations when it came to calculations (thanks for that!!). Also, Can seems very kind and polite (encouraged us all the time to send questions if we don't understand the content)
- I enjoyed the detailed (step-by-step) instructions to solve the study questions
- I liked that you took your time to explain each step of the calculations (and when I felt like I didn't need the additional instructions I could easily skip forward to the next question or increase the speed etc thanks to the youtube features)
- I really liked how well Can answered each question in the ILIAS forum *on the basis that there are no stupid questions* and introduced more graphs or examples. Thanks for the effort!
- Please, see "online survey for FIN 500 Investments | Vorlesung - Herr Stefan Scharnowski"

  Summarized:
  - Very knowledgable, friendly, and clear explanations
  - Clarifications in the Q&A session very valuable
  - Video lecture are nice to watch due to play/pause and the way of presenting
- Professor is very interesting and can explain concept clearly.
- The case study was a great format.
- The course allowed us to remain very flexible. The course instructors always answered questions in detail and cared about the students' understanding.
- The course was very well prepared for an online learning experience. Can was very fast and helpful when answering questions in the forum. Presentation style was very good and natural.
  Thank you for your effort!
- The format was as good as possible in the current situation. The instructor did very well, and you could tell he had a lot of knowledge and greatb interest in the subject.
- The structure of this course is clear and easy to understand. And the profession is always patient to explain everything included in slides.
- Very expressive explanations of the solutions.
- Very friendly, cooperative and motivated lecturer

  Useful and bottom up explanations
- Well structured and organised course especially with all the pre recorded videos. I liked that all material was instantly available on Tuesdays and there was no delay with the upload of the recordings for the Q&A Sessions
- instructor was always in good mood and smiled on the videos, that was motivating

  saying before, that matrizes are tedious, so students didn´t get disencouraged

  very detailed explanations
- prerecorded videos i find good

What should be improved?

- -

- Although you mentioned it before the course started, I would have preferred to receive the solutions to the questions, maybe not directly after the video was uploaded but a week later or so
- Case study was very interesting, although the tasks were a bit repetitive soon. More variety and more computer-based application would have been great.
- Comments on the ILIAS forum felt less valuable for me (you have to follow a story of 2 other people). However, it is nice to have the opportunity if you want to ask you yourself.
- Could we involve some practical parts in this course?
- Given the online semester, and online exam, I believe this was a great opportunity to use more excel to calculate everything. This is what is mostly used in the professional world, and I think we should have been encouraged to use it in the exam.
- I would have often wished for more detailed explanations for the more qualitative questions. Here the explanations were sometimes pretty short compared to the ones for the qualitative questions (e.g. the questions in chapter 1 about derivatives or house insurance).
- I would like to have more deepen exercises regarding several topics covered in the lecture. For example, I would have appreciated additional exercises to train the calculation especially in preparation for the exam (optimal portfolio construction, VaR/CVaR, LPM, etc.
- Maybe distribute the solutions to the questions after the session (at least the results). I don't think that this would reduce attendance of the exercise sessions because of your good and useful explanations.

  Potentially, some more "real" Excel applications - they were really interesting!
- My learning tendency was to start learning at the latest point, because when everything is recorded I concentrated on other classes in October, which turned out to be a disaster. If you could have online-classes each week *with recording, I would be consistent. #myproblem
- Perhaps distribute the study questions as LaTeX scripts instead (like every other (normal) finance course)? I found it awkward to have PowerPoint-like slides. Also, it would have been nice to have some more exercises to practice with, especially for those including calculations.
- Sometimes the questions seemed a little too easy for the class content. And I think that more questions would have been better.
- The explanations could be improved with regards to clearing up remaining questions. In this case, the online format was not ideal as questions could not be asked immediatly.
  This made it of course difficult for the instructor to pin point where the students are struggeling to understand the content.
  A onlie-live tutorium would have been more approriate.
- Very nice. If must to say something, I hope it will include more practical examples in slides to help students understand some concepts.
- the tutorials could have been more comprehensive and detailled. sometimes they didnt help me to understand how the solution was obtained.
- written solutions uploaded

  solutions to previous exams uploaded
