Course of Study

Targeted degree:

Semester (only for your actual course of study):

I attended the course regularly:

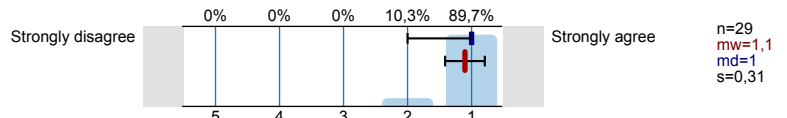

I am an exchange student:

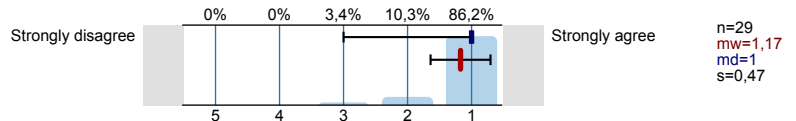

Evaluation of the course

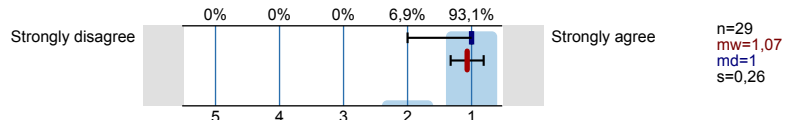

Course objectives were clearly stated.

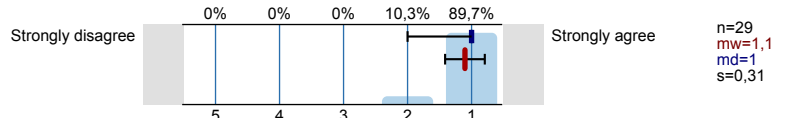

Course requirements and criteria for grading were clearly explained.

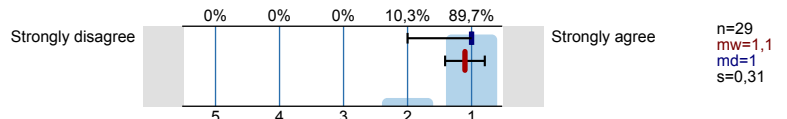

The course was well structured.

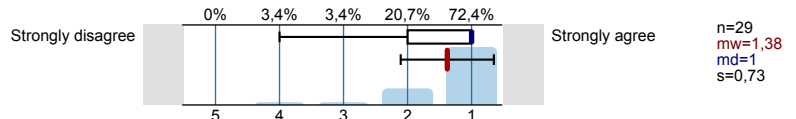

The choice of topics was explained by the instructor.

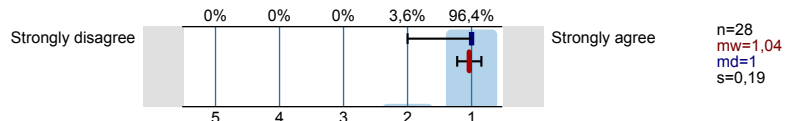

The choice appeared well-founded to me.

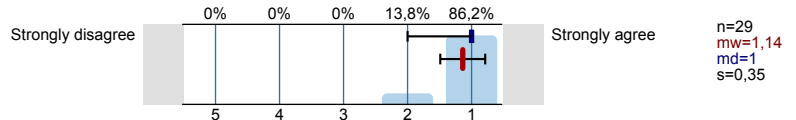

Dissemination of subject matter was appropriately placed over the semester.

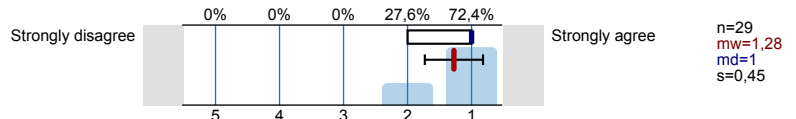

Course content was presented in a comprehensible manner.

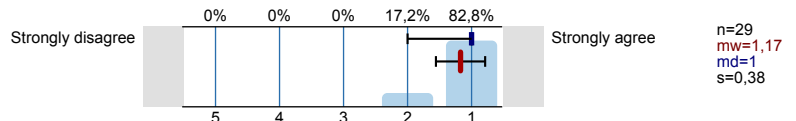

Instructor illustrated subject matter with examples from the business world and from current research.

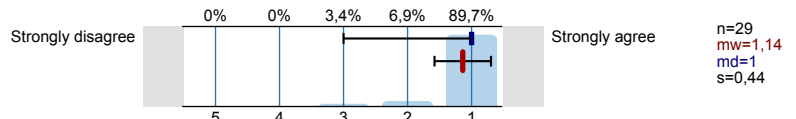

Where appropriate instructor drew parallels to business-related disciplines.

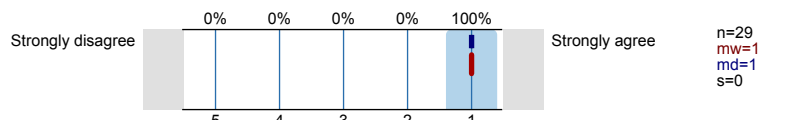

Instructor incorporated audio-visual media effectively (e.g., blackboard, overhead projector, video, beamer).

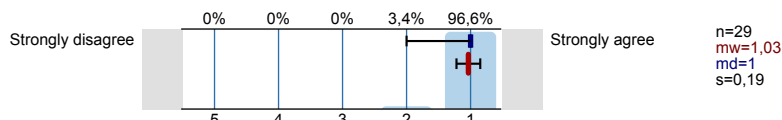

Visual materials were easy to read and follow.

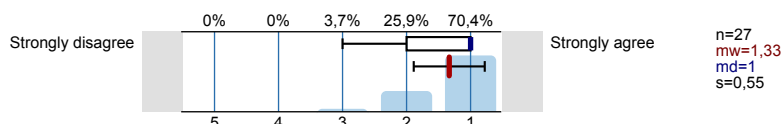

Instructor provided the opportunity for questions regarding content.

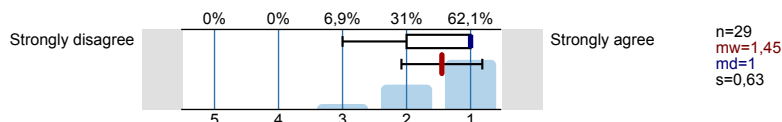

Answers given by the instructor were helpful in clarifying uncertainties.

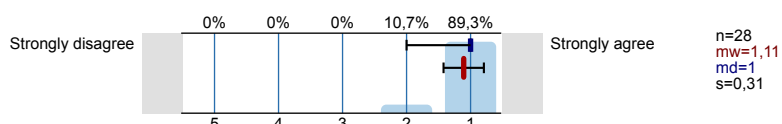

Recommended reading materials (e.g., lecture notes, literature) were useful in facilitating understanding of course content.

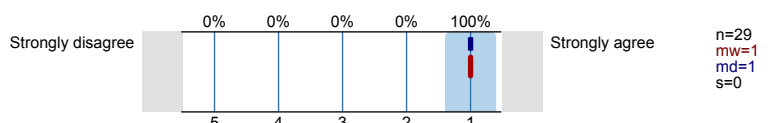

Recommended reading materials (e.g., lecture notes, literature) were readily available.

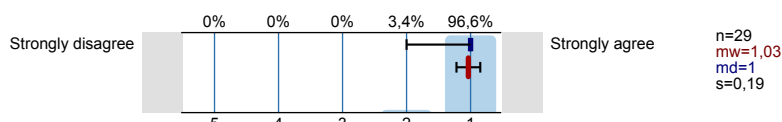

Instructor's manner of speaking was clear and audible.

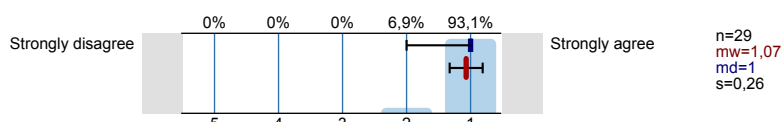

Instructor spoke at an appropriate speed.

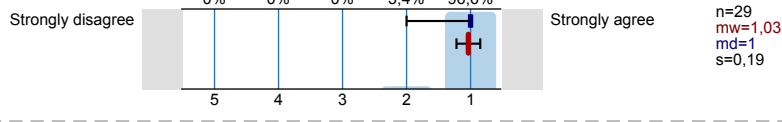

Instructor's lecturing style sustained my attention.

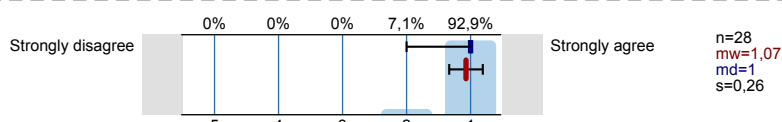

Instructor was open to subject-oriented issues.

Instructor was open and friendly towards students.

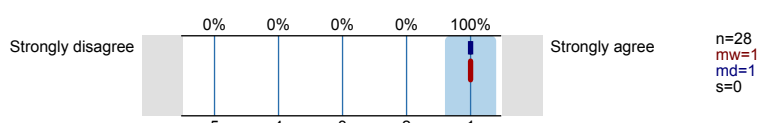

Instructor was able to arouse my interest in the subject.

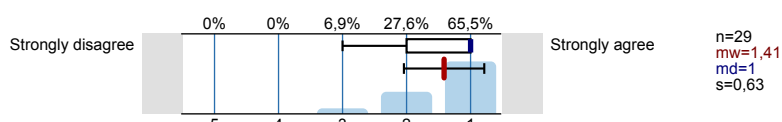

Evaluation of general satisfaction with the course

Overall, I am satisfied with the course.

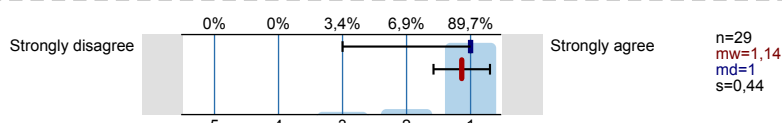

Evaluation of teaching and learning environment

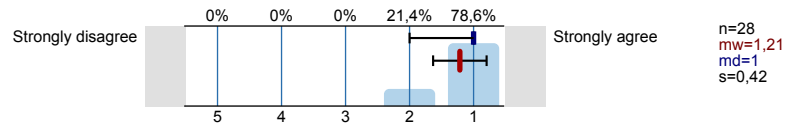

Prior knowledge and experience helped me master the course content.

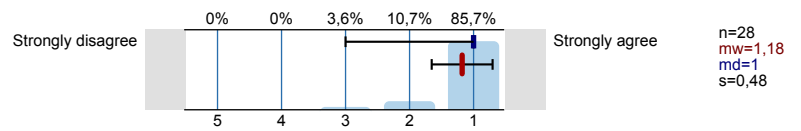

Technical equipment (overhead projector, beamer, blackboard, microphone, etc.) was always ready for use and functioned properly).

Size of the room was adequate for the course.

The room setup (seating, tables, lighting, ventilation, etc.) was satisfactory.

What did you especially like about the course?

<p>The chapter of default risk is too long. Portfolio models may be better to put in another single chapter and explained detailedly, or otherwise can be dropped.</p>	<p>The lectures are interesting and detailed, convincing. exp Thanks a lot Prof. Theissen!! ☺</p>
<p>Very intensive course</p>	<ul style="list-style-type: none"> · very nice professor, explains things thoroughly · This course provides insightful information into bond markets
<p>- Clear structure of course - Also including recent topics (low interest rates)</p>	<p>The material, explanation</p>
<p>The way the exp advanced content was presented in a simple way. Prof. Theissen is one of the best lecturers at Mannheim from my point of view. A great course!</p>	<p>clear structure, very well explained. the professor is very friendly and explains everything very logic and clearly. perfect perfect and very useful lecture overall.</p>
<p>I think Chapter 7 (Portfolio Management) can be dropped. Not because it's too long, but because it's too short, and we learned a lot about this in other finance courses, so I think it's not very necessary to learn it again. Other chapters should be kept, because the basic knowledge in the first 4 chapters are very important.</p>	<p>The topics were really interesting. The instructor did a great job in explaining more complex problems.</p>

<ul style="list-style-type: none"> • speed of lecture • very helpful insights, deep information 	<p>Prof Theissen introduced the content very clearly and the logic was really clear and not difficult to follow, although the contents were not simple and not few.</p>
-------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>expression clearly</p>	<p>Overall, I'm very satisfied, and thank you for presenting chapter 8.</p>
---------------------------	-----------------------------------------------------------------------------

<ul style="list-style-type: none"> • explanations of instructor • really interesting course 	<p>After Investments this course added interesting topics and helped to complete an overall picture. The typical "Theissen" structure of the course with study questions and clear slides was was great!</p>
---------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<ul style="list-style-type: none"> - choice of topics - clear and understandable explanation - relevance to current issues 	<p>everything fine, I liked the exact applications subject that could be left out (in my opinion) = slides covering scripts (were also covered in Bonusvideo I)</p> <p>Wichtig</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>Very interesting and well structured course. Pr. Theissen is one of the most pedagogic professors I have ever had.</p>	<p>the integration of lecture and exercise</p>
---------------------------------------------------------------------------------------------------------------------------	------------------------------------------------

What should/could be improved?

<p>When Prof. explains the study questions and writes on <u>wet</u> blackboard. It's really hard to read. o.k. !! Others are PERFECT!</p>	<p>Maybe drop the warrant part</p>
<p>I'd like to have additional, or, separate exercise session. Some concepts like Duration & convexity are too easily described in the lecture. Actually I don't think the lecture is too long, rather I think it's compact enough → I would even like more sessions! Very nice course.</p>	<p>- (content good & interesting) ↓ don't know what to shorten...</p>
<p>To add about MBS To shorten introduction To use electronically available literature</p>	<p>There's always parties on Thursday afternoons. Chapter 6 the content at the beginning regarding rating can be shortened.</p>
<p>The chapter for default risk was too long. when preparing the exam got a little confused whether all the theory at need to be remembered.</p>	<p>We could make the 2. Chapter "Pricing Bonds" a bit shorter. It is difficult to eliminate some topics because all seem to be well chosen.</p>
<p>• include a small case study on how bond investors implement bond strategies</p>	<p>Chp 6 about the Ratings, too much details.</p>

the inner connection of these chapters

~~the~~ In my opinion the topic "swaps" is not 100% necessary (but still interesting)

Swaps could be left out, Rego might be discussed shorter

- chapter on default risk could be shortened a bit (e.g. section on portfolio models)

• Shorten the introduction chapter

• much of the required readings only repeats the lecture. If only additional content would be in the readings, it would make the readings more relevant and rewarding
