Professor explained it well without
academic arrogance

It was a great and very fun course,
unfortunately we couldn't discuss high-yield
bonds not covered bonds

Very good explanations

early exam

Professor Theissen's lectures are the best !!!

Professor is great!

I really enjoy it

The in-depth analysis of all topics where
also additional reading materials
were provided

The course gave me a good insight into
the world of bonds which I assume
will be useful knowledge in ~~future~~
the professional life later.

Professor.

Very nice organized except the room
was always too small.

It was very interesting

Subject of the course,

Lot of info in the slides,

I liked ~~the~~ the professor's lecture style very much.

- The professor has outstanding teaching qualities, meaning that even very difficult subjects are explained in a way understandable for every student.

What should/could be improved?

Many concepts mentioned in different chapters repeatedly

So sometimes a little bit confused.

Also, the assumptions have changed during different chapters and sometimes hard to follow.

too ~~many~~ required readings in

The professor could provide earlier the ~~the~~ previous years exams.

~~It would~~ for some topics, it could be helpful to have more detailed slides

The room is too small! All of us were packed, while trying to use a notebook & laptop.

STOP teaching things that are NOT used in the 'real world'.

Does not make sense to see this.

- Discuss more past exams
- Greater consistency between study and exam questions

More focused required readings. Suggested readings were often equal in content and didn't show much variation. Focusing on few core readings would be better.

Maybe provide answers for H.W. in written form.

Please share more Exam papers.

More time between end of lectures and exam; Pool lectures together time-wise; somewhat bigger room needed

More practical tasks, exercises could be provided

Sometimes instructor talks too fast.

Room Size.

Deliver a little fast. out of expectation.

The speed (a little bit too fast)

As a Business Informatics international student, I had some difficulties to understand some thing without an economic background. Maybe some literature in the beginning, which can easily be understood & quickly fit into the process, can be introduced.

Correction of exercises in Iliad.

Correction on Iliad:

More details in the slides (not only bullet points).

More examples.
