E.=Enthaltung

### Course

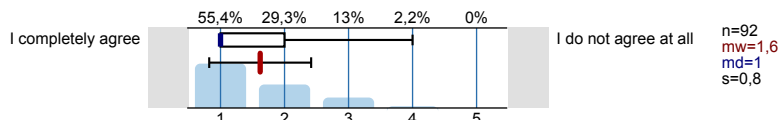

The course contents were very well structured.

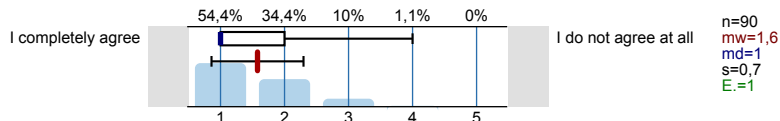

The course contents were illustrated very well by using appropriate examples.

The instructor motivated me.

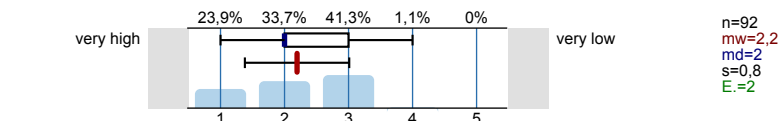

The instructor encouraged the open and creative participation of students.

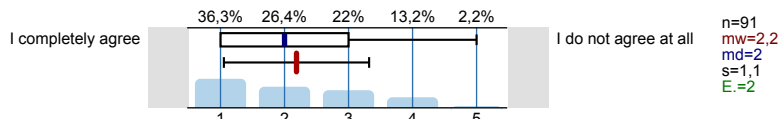

The instructor demonstrated a high level of commitment in this course.

In relation to the number of ECTS credits I receive, the average workload for this course is ...  
(One ECTS credit corresponds to an average workload of approx. 30 hours.)

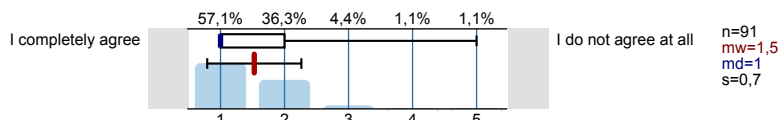

I had sufficient previous knowledge to follow the course.

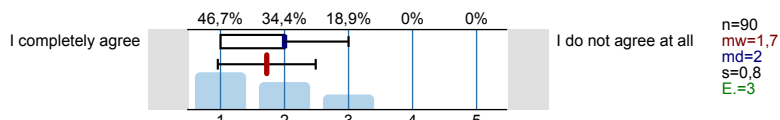

### Teacher

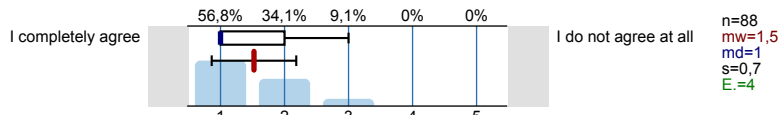

Instructor's explanations were clear.

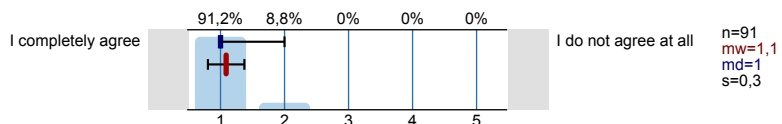

Students were encouraged to form an opinion on the content of the course.

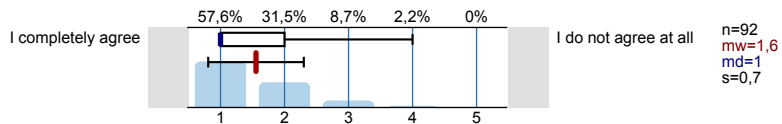

Proposed objectives agreed with those actually taught so I knew where course was going.

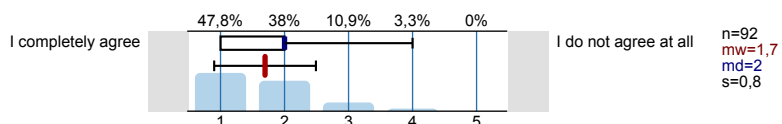

The instructor was well-prepared with regard to the content of the course.

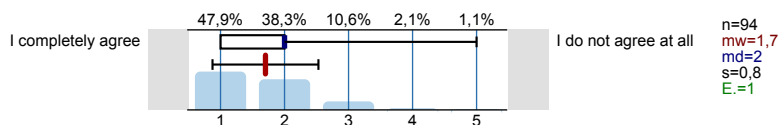

The material distributed (literature, slides, etc.) helped me acquire the knowledge.

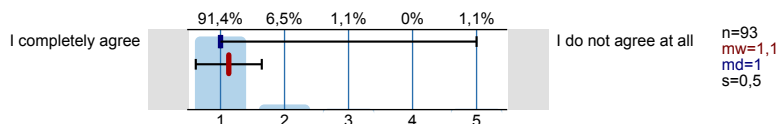

The instructor created a link between theory and practice.

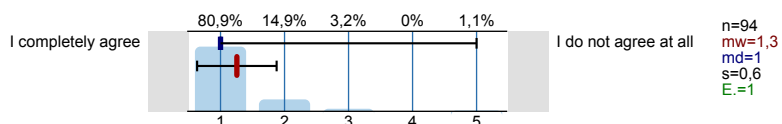

The instructor conveyed why the content is valuable and useful.

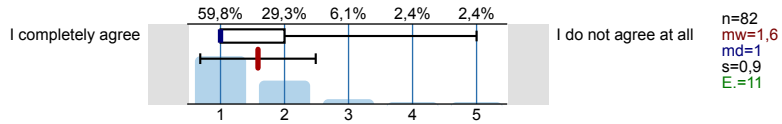

The instructor was polite with the students.

The instructor was cooperative and open-minded.

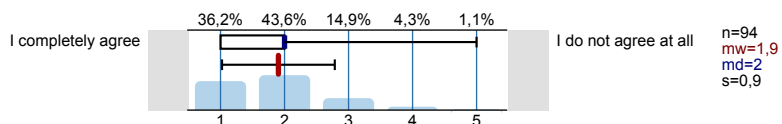

Evaluation criteria were transparent.

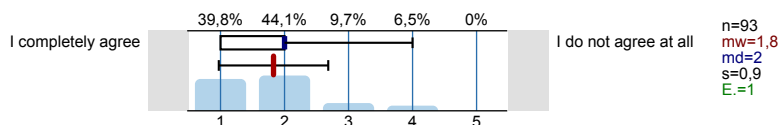

Learning Outcome

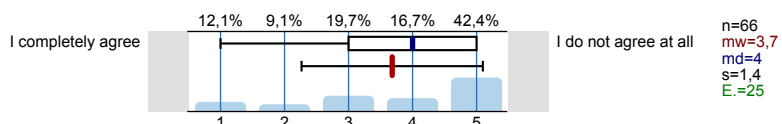

I improved my methodological competence thanks to this course.

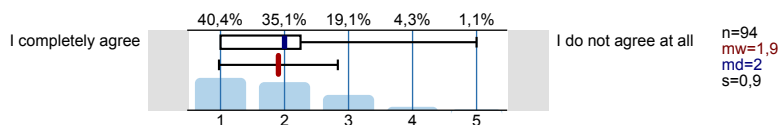

I improved my professional competence thanks to this course.

I improved my presentation skills thanks to this course.

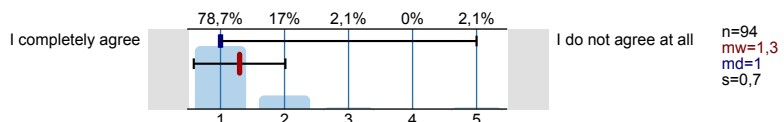

My interest in the subject has increased as a consequence of this course.

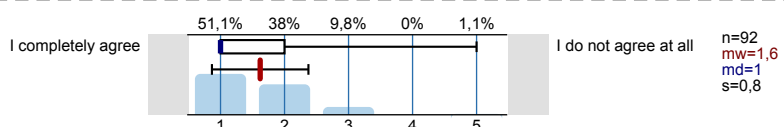

Overall

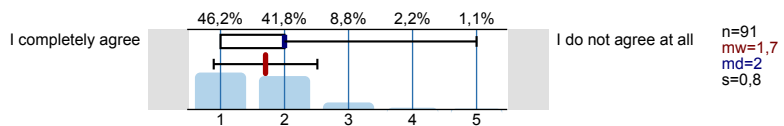

Overall, I am very satisfied with the instructor.

Overall, I am very satisfied with the course.

I learned a lot in this course.

## Auswertungsteil der offenen Fragen

## Open Questions

What did you particularly like about this course?

I like the way Professor combined theory with practice.  
Mir gefällt besonders die klare Struktur <sup>der</sup> ~~des~~ Materialien

It helps me a lot to gain more knowledge about finance, I was studied Economics in my bachelor study. And this help me learn ~~the~~ new knowledge about finance field.

Very Good.

- professor always repeats the questions student ask.!
- provide clear explanation. always !

the mathematical bases on which each chapter was delivered.

- presentation of previous exam for practice
- empirical studies as examples

Very competent instructor,  
 Instructor was very clear in explanations

Very good and competent instructor.  
 Super structured.

• STRUCTURE / VERY USEFUL CONTENT / AND GOOD  
 PRESENTED

I liked everything and the examples the Professor discussed were very interesting (I wished some of them were on the slides however).

I particularly like the topic of investments, and this course has helped me to improve my understanding of it.

The Professor was very motivated, always made sure that the students can follow this course by asking questions and reexplaining some topics. I also really like that it is possible to apply the things we learn in this course to real life.

I hope the lecture & exercise could be held on different days. It was too tired to have so many courses in a single day.

Great Professor! Very nice and likeable  
 Exercises helped

The jokes :)

Oh, seriously... I like the way the professor explained the concepts.

The combination of theory and application in Excel or so

Well structured contents

# Theissen

detail & funny; complementary of my bachelor-study.

polite and nice of Theissen: :)

I will continue to choose your course Bond Mkt..

Very good structure

and theory and practice

- topics covered were very interesting
- Actual research papers
- Case Study

- Very well structured
- Lays the basis to learn more advanced content in a very clear manner.

Case studies. Empirical tests of presented methods.

Case studies

Participation in the course helped understanding the topic much better than reading the literature or slides because the instructor explained the theories well.

The instructor explained the course very clearly.

Clear structure & conclusive -after-lecture exercises, sufficient preparation for exams!

All materials are clearly presented with very easy examples

broad knowledge

Very diligent professor, that publishes a lot of relevant literature.  
It was highly sophisticated and a big challenge.

It was interesting and presented very well by Prof. Theissen.

well-organized.

Final case study helps a lot

The instructor's enthusiasm about the topic

Congratulations on your baby.

Very good lecture, well structured and friendly professor

Impressive lecturing style which keeps the students' attention high throughout the whole lecture

The explanations the instructor gave the Q&A session and the empirical evidence presented in class

The instructor's style of presentation was very good. He talked freely and fluently.

→ linkage to practice

Prof seems very competent and happy to answer questions

- Prof
- good explanations
- 

## HUMOR OF INSTRUCTOR

mixture of session & exercise

- Very engaged lecturer
- Clear structure of course
- Upload of all slides at the beginning of the course

What should be improved?

Sometimes it was difficult to understand answers to important questions from the slides, because you were talking a little bit too fast. Maybe you could repeat important information or some kind of a take home message. Thanks!

Nix.

More exercises would certainly help.

More exercises as preparation for the exams, <sup>more</sup> solutions <sup>of</sup> the exercises should be uploaded at least at the end of the lecture.

important outcomes/conclusions were sometimes presented very fast so that it was hard to follow and make notes at the same time

Exercises could be implemented in a more ~~simple~~ practical "story".

Exercises with mathematics done step by step by hand and not only with Excel. (since we cannot use Excel in the exam).

- MORE PRACTICAL EXAMPLES (HELP BETTER TO COMPERHEND THE MATERIAL)

- TOO LONG EXPLANATIONS OF THE CALCULATIONS

0. TILC. MATH. REHTNDF TIF IZDMIA

Some examples were briefly discussed, but not written on the slides, so they are easily forgotten ~~about~~. Also sometimes was hard to make some notes, since ~~it~~ we had to listen to what the professor said, so I would make the slides more detailed.

I would add more practical activity, split the evaluation.

\* Have actual exercise sheets and not just discuss chapter end questions

~~Have paper tutorials with fewer students~~

Answer the questions a little bit slower, so everybody can write it down. It is not easy to remember 3-4 sentences in some seconds.

More exercises in class

Some citations or graphs from published papers should be better explained and proper footnotes and notation will be appreciated.

EASY EXAM, make it faster and easier next year

~~Some German accent~~

- provide additional exercises
  - ↳ maybe provide an exercise class

Some explanations should be included in the slides in order to follow the course without knowing every spoken word remembered from the lecture

CH5 is too technical as I do not have prior knowledge w.r.t the methodologies.

perhaps more industry examples to illustrate the practical importance of all theories

Sometimes the professor speaks too fast so can't hear clearly or take notes in time

A way to acquire the prerequisites could be developed.

Provide ~~more~~ more exercises as preparation for the exam.  
Provide more old exams for practice and the solutions.

More real-life examples could help understand the context better.

- course is rather theoretical, more practical examples would be great
- maybe exercise sessions would be nice

A bit more time could have been spent on the matrix calculation as they appeared quite abstract.

the lecture should not be twice in a day because it is very hard to find motivation for something that you already heard earlier on

Exercise classes to practise the explained methods

solutions to end of chapter - questions

→ more exercises

- Required readings should be available as E-books
- More exercises
- Upload solutions for exercises

It would be better ~~to~~ if the answers to the study questions were written down in a manner which is expected in the exam. This would also ensure that students are able to follow the explanation and have a complete answer

Upload all Excel-files.

~~More explicit~~  
Creating link between context on slides and application in real world.

- less slides

- UPLOAD SOLUTIONS

- REWORK BULLET STRUCTURE ON SLIDES AS THEY WERE OFTEN NOT WELL OR MESSY

Reduce workload for FIN 541 so next time I've got the chance to actually follow this class

- 3x 1h session instead of 2x 90 minutes because of high level
- provide solutions for end of chapter questions

- Solutions of exercises should be uploaded (→ was it one session)
- Solutions of old exams should also be uploaded

- often too fast ←
- solutions should be uploaded or better use the board to write more because

Too fast
